

this matter. This matter, this patent legislation, is important in returning America's economy to a position of strength.

As we speak, there are 750,000 patent applications that are stuck in the Patent Office because they do not have enough people to do the work. It is true to Democrats' agenda from day one: creating jobs and ensuring America can compete in the 21st century's global economy.

Now, Madam President, I see my friend from Oklahoma on the Senate floor. A couple of things he has done in recent days have been extremely important: first of all, the money that is collected in the Patent Office should be used in the Patent Office. I also think it is important people recognize we have an entity around here called the General Accounting Office, which is the watchdog of Congress. It is an important entity. It is available to both Democrats and Republicans.

My friend from Oklahoma wrote a letter, as he has a right to do, about a couple different areas finding where there was duplication of services. They studied this and came back with what I think are some matters to which we need to direct our attention.

Duplication in different entities around here has become untoward. So I commend and applaud my friend from Oklahoma in helping us go down this path that I think is going to be extremely important for us to work our way out of the problems we have.

I know we have a lot of work to do, and it is important we do that work. We are going to get this spending matter out of the way today. Then we will have, as I have indicated, a little over 2 weeks to work something out on a long-term basis. The President has said he would like a longer period of time. We could not work that out with our friends on the Republican side. I hope, I hope they do not need a government shutdown—and I am not referring to my friends in the Senate but the House. I hope they do not need a government shutdown to do what is necessary for this country. I think we should avoid that shutdown, and we can avoid that shutdown and still recognize that there are costs that need to be cut from government spending. It cannot all come from our domestic discretionary side of the ledger. There are Pentagon moneys that can be saved. There are other programs that have been untouchable in past years that we need to look at for a long-term solution to the country's problems.

Senator REID's prediction that the Senate will follow the House in approving a \$4 billion cut for the current fiscal year is a small step, but it is indeed a step in the right direction. This is a long-awaited acknowledgment by Democrats in Congress that we have a spending problem around here. It is hard to believe when we are spending \$1.6 trillion more than we are taking in in a single year that it would take this long to cut a penny in spending, but it is progress nonetheless. It was also encouraging to hear the White House say yesterday that they would be supportive of a 4-week CR with \$8 billion in cuts. So it is encouraging that the White House and congressional Democrats now agree that the status quo won't work and that the bills we pass must include spending reductions.

Beyond that, the GAO report which Senator COBURN requested and which we all saw yesterday makes it pretty clear—to me, at least—that there are a lot of very obvious targets for additional cuts. I wish to thank Senator COBURN for requesting the report, first of all. I don't think most Americans are surprised to hear that Washington is wasting so much money. I do think some people might be surprised at how rampant it is and, frankly, the sheer idiocy—the sheer idiocy—of some of the waste we have been tolerating around here.

I can't imagine anyone in the Senate voting against a bill that would return to taxpayers money we are wasting on the bloated and duplicative programs outlined in this report, programs which, as ABC put it, are chewing up billions of dollars in funding every year. It would be an embarrassment and a double indictment of Congress to not act. The report is damning, but it comes at a good time. Right when we are looking to make cuts on which both parties can agree, we learn that we have a roadmap showing more than 100 programs dealing with surface transportation issues, 82 programs monitoring teacher quality, 80 programs for economic development, 47 programs for job training, and 17 different programs for disaster preparedness. Here is my favorite: 56 programs to help people understand finances.
