

leader of the bay program's Water Quality Team. The biggest problem was conveying what might seem simple: "What needs to be done, who is going to do it and how," she said.

Three years ago, the National Institutes of Health attempted to pick up where the country's prestigious medical centers had left off, cracking the code of diseases that cannot be diagnosed.

William Gahl, a pediatrician specializing in clinical and biochemical genetics, took on the challenge as the first director of the Undiagnosed Diseases Program. Interest was so strong that Gahl's \$280,000 budget quickly grew to \$3.5 million. Of 5,000 applicants, 400 have been accepted, though a medical diagnosis has been found for just 60.

"We admit failure in the majority of our cases," Gahl said. "But these are people who have been everywhere else."

Analysts at the Treasury Department's Financial Crimes Enforcement Network have long suspected that Mexican drug traffickers were smuggling cash from their narcotics sales back into Mexico for deposit in local banks. Senior intelligence research analyst Ann Martin, 29, analyzed tens of thousands of bank transactions and discovered last year that billions of dollars in illegal drug profits were entering the Mexican banking system from the United States. Her work led the Mexican government to issue new regulations capping the amount of American dollars that can flow to Mexican banks.

Post-traumatic stress disorder is a well-known mental health issue facing service members, but when Matthew Friedman began his career working with veterans 40 years ago, the term did not exist.

Today, the psychiatrist and pharmacologist is executive director of the Veterans Affairs Department's National Center for PTSD, based in White River Junction, Vt. Since the center was created in 1989, Friedman has expanded it to seven VA medical centers across the country. He overcame many skeptics along the way, who believed the affliction was not a serious disorder. At 71, Friedman now wants to understand how to prevent the disorder and why some soldiers suffer from it while others don't.

"What is the difference between resilient and vulnerable people?" he asked.

STAMP OUT HUNGER FOOD DRIVE

Mr. BENNET. Mr. President, today I honor the National Association of Letter Carriers' Stamp Out Hunger Food Drive. Every year, on the second Saturday in May, letter carriers across the country collect nonperishable food as part of the Nation's largest one-day food drive, distributing the donations to local food banks. In these difficult economic times—as families continue to make ends meet and food banks deal with tightening budgets—these efforts are especially important.

The Stamp Out Hunger Food Drive is just one example of how letter carriers work to make a difference in the lives of those they serve. Since the food drive was launched 19 years ago, they have collected a billion pounds of food, including 77.3 million pounds last year alone. They do all of this in service of the communities in which the live and work. And the work they do remains essential. Even in today's electronic society, millions of us depend on letter carriers to deliver everything from birthday cards to life-saving prescription medications.

In recognition of all letter carriers, their hard work and their commitment to their communities, I ask that all of us join with them in support of their one-day food drive and make a donation of nonperishable food items this Saturday, May 14, 2011, the National Association of Letter Carriers' Stamp Out Hunger Food Drive Day.

ADDITIONAL STATEMENTS

NEW HAMPSHIRE TIMBERLAND OWNERS ASSOCIATION

• Ms. AYOTTE. Mr. President, today I recognize and congratulate the New Hampshire Timberland Owners Association on achieving a commendable feat—100 years of successful forest management, conservation, and awareness efforts.

The New Hampshire Timberland Owners Association will hold its centennial annual meeting this year in Whitefield, NH, at the Mountain View Grand Resort from Friday, May 20 through Sunday, May 22, where the association will gather at Weeks State Park—the former summer home of Senator John Wingate Weeks, the author of the 1911 Weeks Act, a landmark piece of conservation legislation which paved the way for the formation of the White Mountain National Forest.

The New Hampshire Timberland Owners Association was established as a nonprofit organization in 1911, with William R. Brown serving as president. By 1912, the association had 32 members. Today, the association celebrates 100 years of hard work and its more than 1,400 members representing land ownership of over 1 million acres.

The association's initial objectives were the protection and improvement of timberland and property rights. The members' efforts focused on planning and acting on matters relating to forest management, legislation, and taxes. Today, the association is a statewide coalition of landowners, forest industry professionals, government officials, and supporters who work together to promote forest management and conservation of New Hampshire's working forests and to ensure a vibrant forest products industry.

Since its inception, the association has continuously grown and expanded its efforts. Working with the State of New Hampshire, the Federal Government, and local governments, the association has ensured that New Hampshire's timberlands are managed for the benefit of timberland owners and, ultimately, the best interests of the timber economy of our great State. Together, landowners and forest industry professionals share the understanding that a well-managed forest is essential to New Hampshire's economy and our identity. The New Hampshire Timberland Owners Association represents some of the most treasured characteristics of the Granite State—teamwork, foresight in innovation, vision, and initiative.

As the New Hampshire Timberland Owners Association celebrates its first 100 years, I commend their efforts and congratulate them on a job well done. I ask my colleagues to join me in recognizing the New Hampshire Timberland Owners Association's centennial celebration.●
