

solid waste when combusted and that the units combusting those materials can continue to be used as fuels without having to meet the CISWI standards. Mr. Stanislaus requested that the industry representatives provide the Agency with supporting data on traditional fuels that could further inform the development of such guidance, and asked for feedback on the approach he outlined. In addition to this approach, the Agency is also exploring other options.

We recognize that stakeholders have also raised other issues with the NHSM rule. We are continuing to evaluate those issues expeditiously.

I believe we have made significant progress in addressing the concerns raised by the industry. I will continue to watch the issue closely and keep you informed. My goal is to bring these issues to closure as soon as possible.

Sincerely,

U.S. ENVIRONMENTAL PROTECTION  
AGENCY, OFFICE OF SOLID WASTE  
AND EMERGENCY RESPONSE,  
Washington, DC, July 11, 2011.

Hon. RON WYDEN,  
U.S. Senate,  
Washington, DC.

DEAR SENATOR WYDEN: Thank you again for the constructive dialogue regarding issues relating to EPA's Non-Hazardous Secondary Materials (NHSM) rule, the Boiler Maximum Achievable Control Technology (MACT) rule and the Commercial and Industrial Solid Waste Incinerator (CISWI) rule. In the Administrator's letter of June 27, 2011 she indicated that the agency is exploring various pathways to address your specific concerns regarding implementation of the NHSM rule. EPA is committed to issuing guidance to assist industry in applying the legitimacy criteria, and had requested that industry representatives provide the agency with supporting data to further inform the development of such guidance.

We received additional information from industry and based on this information and further discussions, we have developed the enclosed concept paper for the development of guidance. The paper identifies approaches to the guidance that EPA continues to evaluate for determining whether concentrations of contaminants in the NHSM are "comparable" to concentrations of those same contaminants in traditional fuels. These comparisons are important in ensuring that NHSM are being legitimately recycled and are not solid wastes, as well as recognizing the varied uses of such secondary materials as product fuels.

We are optimistic about our ability to develop guidance that meaningfully addresses the industry concerns and we are giving it the highest priority within the agency. We intend to complete internal development of draft guidance based on the concept paper by August 31, 2011. In addition, we continue to evaluate all available options available to address the issues raised.

Please be assured that EPA will continue to keep you informed of our progress in addressing the issues involved with the NHSM rule, as well as the related Clean Air Act rulemakings. If you or your staff have any questions regarding the enclosed concept paper, please contact me or your staff may call Carolyn Levine in EPA's Office of Congressional and Intergovernmental Relations at (202) 564-1859.

Sincerely,

MATHY STANISLAUS,  
*Assistant Administrator.*
