

1.5 million names and stretch 2½ miles, 25 times the length of the Vietnam Memorial.

I have had enough of Congress' failure to lead. So each month that we are in session, I am going to speak the name of every person killed in a mass shooting in this country. I will also create my own memorial wall in the hallway outside my office.

Here are the stories of some of the victims of the 18 mass shootings in January of this year. There have been so many people last month affected by mass shootings that I don't have the time to list those who were injured, just those who were murdered.

David Washington, age 24, Eneida Branch, age 31, and Angelica Guadalupe Castro, age 23, who were shot and killed in a house on January 6 in Lakeland, Florida.

Antoine Bell, age 17, was shot and killed while helping a woman with car trouble on January 7 in Memphis, Tennessee.

Raymon Blount, age 29, was shot and killed while standing on the street on January 8 in Chicago, Illinois.

Ira Brown, age 20, was shot and killed on January 11 during a home robbery in Wilmington, Delaware.

Joshua Steven Morrison, age 18, was killed near a house party January 17 in Gloucester County, Virginia.

Randy Peterson, age 64, was a bank president shot and killed during a robbery on January 21 in Eufaula, Oklahoma.

Kevin McGrath, Sr., age 47, and Shanna McGrath, age 42, were killed at their family home on January 23 in Crestview, Florida. Elbert L. Merrick, age 22, was killed outside the home on the road.

Jason and Jacob McLemore, a father and son, age 44 and 17, were killed at the gun store they owned in a dispute over a \$25 service fee. This was on January 23 in Pearl River County, Mississippi.

Cyjia Nicole Bell, age 16, Shujaa Jasiri Silver, age 19, were killed outside a liquor store on January 23 in Los Angeles, California.

An unidentified man was killed at a Mexican restaurant on January 25 in Perris, California.

James Quoc Tran, age 33, and Jeanine L. Zapata, age 45, were killed at a homeless encampment on January 26 in Seattle, Washington.

The Dooley family, including mother Lori, father Todd, son Landon, daughter Brooke, and grandmother Doris, were killed at their family home on January 27 in Chesapeake, Virginia. The shooter, their son, Cameron Dooley, committed suicide after murdering the family.

Andre Gray, age 42, and Tina Gray, age 42, were killed at their family home on January 29 in Caroline County, Virginia.

Sean Marquez, age 19, Jose Aguirre-Martinez, age 19, and Yovani Flores, age 16, were killed at a house party on January 30 in Glendale, Arizona. Sean Marquez died in his sister's arms.

Victor Mendoza, age 46, was shot and killed at a motorcycle show in Denver, Colorado, on January 30.

May the dead rest in peace and the wounded recover completely. It is time. It is time for Congress to end this bloodshed.

APRIL BROOKS' STORY

The SPEAKER pro tempore. The Chair recognizes the gentleman from West Virginia (Mr. JENKINS) for 5 minutes.

Mr. JENKINS of West Virginia. Mr. Speaker, the war on coal touches nearly every family in southern West Virginia. President Obama and his EPA regulations don't just close mines. They put families out of work.

Coal miners call it job scare. Every time miners go underground, they don't know, when they come up, if they will receive a WARN notice telling them that they are going to be laid off. Families worry about making ends meet or moving to find work someplace else.

Businesses that depend on coal are suffering, too. CSX recently announced it is closing its Huntington division and moving its jobs to another State, in part because of the decline in coal shipments. Norfolk Southern in Bluefield is also moving jobs out of Bluefield, West Virginia.

Shops and restaurants are closing their doors, as families leave town and have less disposable income. Walmart in McDowell County has recently shut its doors, and the residents in the area have to drive to another State just to get groceries. The uncertainty can be paralyzing.

This is reality for so many of my constituents like April Brooks of Princeton in Mercer County. April writes me:

"My husband has worked in the mining industry for the last eleven years, and my dad was a coal miner for over thirty years.

"Like every family that depends on coal for a living, we live day to day worrying about what will happen tomorrow. You can't plan for the future because of the uncertainty.

"I went back to work several years ago so that we would have supplemental income in case of layoffs. We love our State, but how does one stay here and survive if the jobs aren't there?"

Mr. Speaker, President Obama's job-killing overregulations are having real consequences for real West Virginians. We need to pass policies that create jobs and ensure a future for all West Virginians, all West Virginia families, so they can stay and work and live in our great State.

CLEAN POWER PLAN

The SPEAKER pro tempore. The Chair recognizes the gentleman from California (Mr. LOWENTHAL) for 5 minutes.

Mr. LOWENTHAL. Mr. Speaker, I rise today to speak in support of EPA's Clean Power Plan.

I am concerned that the Supreme Court ruling on the Clean Power Plan will significantly and unnecessarily delay the full implementation of this important action.

The longer we wait, the more expensive it will be to reduce greenhouse gas pollution and the less chance that we have to keep this world's warming below a safe threshold.

This week's Supreme Court decision only highlights Congress' inaction on the issue of climate change as well as the immediate and pressing need for action.

A damaged climate has a negative impact upon our Nation and on my southern California community. Changing weather patterns, more frequent droughts, worsening air quality, and sea level rise all cost us money and threaten the well-being of our families and our neighbors.

We all want the world to be safe, to be a healthy place to raise our families and to grow our economy. Now America has the opportunity to lead the world in making our environment safe and healthy, both now and into the future.

We can do this by increasing our use of local, renewable energy sources, investing in research and development to bring about the next generation of clean and efficient energy systems, and assisting communities both here and abroad in adapting to the inevitable changes that have already been done to the climate.

Reducing emissions from our power sector is a foundational action in this endeavor. This is an achievable endeavor.

America's innovation has given us spaceflight, the Internet, cures to disease once thought to be incurable. Our innovation and our leadership is paving the way for a cleaner, safer world, and many States have already determined how they can meet their goals and reduce carbon pollution.

Cities and electric utilities in my district have taken the extraordinary steps in increasing efficiency and sustainable practices to reduce their carbon footprint.

My State of California is on track to exceed its carbon pollution reduction goals under the Clean Power Plan. California implemented the first statewide carbon trading system and has set ambitious targets for increasing renewable energy, increased efficiency, and decreased petroleum usage.

America's leadership like this will save us money and create jobs, but if we delay, the costs will be higher to us and especially to our children and grandchildren.

We are not doing this alone. Because greenhouse gases such as carbon dioxide spread around the world, no country is immune to the damaged climate. No country can fix this problem alone.

Representatives of over 200 nations recently gathered in Paris and agreed on an international agreement to lower greenhouse gas emissions and develop strategies to adapt to changing climate.

This contribution from the world's biggest polluters, including China and India, represents 90 percent of global greenhouse gas emissions.

These international contributions demonstrate how seriously the world is taking its moral responsibility to care for our common home, our families, and our neighbors.

This roadmap for the world reduces climate-damaging greenhouse gas emissions, increases investments in clean energy development and deployment, and assists the most vulnerable communities in adapting to climate change.

But the United States has to do its part. This pause on the Clean Power Plan slows down the progress we have been making and puts U.S. leadership on climate in question.

I am deeply troubled by the Supreme Court's decision, but I am optimistic that the Clean Power Plan will ultimately be upheld.

By acting to reduce carbon pollution, we will create more opportunity today and a better future tomorrow for all of us.

IN RECOGNITION OF ADMIRAL ROBERT SHUMAKER ON THE 51ST ANNIVERSARY OF HIS IMPRISONMENT DURING THE VIETNAM WAR

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois (Mr. DOLD) for 5 minutes.

Mr. DOLD. Mr. Speaker, today, February 11, a day that for at least me, and I know many other families around our country, is a very dark day.

February 11, 1965, flying off of the USS *Coral Sea*, a young lieutenant commander, Robert Harper Shumaker, was prepared to do a bombing run over North Vietnam.

Taking anti-aircraft fire, he was shot down over North Vietnam. He ejected from his F-8 Crusader 35 feet above the ground, broke his back upon impact, and was immediately captured.

Over the next 8 years, 8 years and a day, he spent time in the Hoa Lo Prison, a prison that we now know as the Hanoi Hilton, one that he was able to name the Hanoi Hilton.

He was considered to be the great communicator because, while he was in captivity, he and a few others devised a tap code system, a tap code system with five rows and five columns that enabled American POWs to communicate with one another to be able to let them know that they were thinking of each other, to be able to make sure that they were exercising the most important muscle in captivity, that is, their brains.

Over the course of those 8 years, Lieutenant Commander Shumaker was

considered to be one of the top greatest threats to camp security.

He and 10 other POWs, commonly known as the Alcatraz 11, were taken out of the Hoa Lo Prison, brought over to a prison now known as Alcatraz, and put in solitary confinement.

These 11 heroes included James Stockdale; George Coker; Jeremiah Denton, who was a Senator from the great State of Alabama; Harry Jenkins; George McKnight; James Mulligan; Howard Rutledge; Ron Storz; Nels Tanner; and, Mr. Speaker, our colleague SAM JOHNSON of Texas, who was elected to this body in 1991 and has served with distinction ever since.

□ 1030

Many of the stories that we look back on came from these heroes about the efforts they made to resist their captors. They were tortured day in and day out for information. Yet, day in and day out, they battled back.

For me, it is very important that we never forget. Fifty-one years after February 11, 1965, I am honored to be able to rise in this body to remember Robert Harper Shumaker for his valiant efforts and heroism. He is near and dear to my heart, Mr. Speaker. He is my uncle. When my wife and I had our first child, we decided we would name her after him, in the hopes that she would have a little bit of the courage, a little bit of the intelligence, and the stick-to-itiveness that Admiral Shumaker has.

The good news, Mr. Speaker, is that February 12, 1973, 591 POWs started their return home. Bob Shumaker, the Alcatraz 11, and many others were on that C-141 that flew out of Hanoi. I am proud to say that they returned home with honor, which was absolutely critical not only for them, but for all of the POWs. It is imperative that we in the United States Congress never forget their sacrifice and heroism.

For me, from now, until as long as I am able to serve in this body, on February 11, I will rise and recognize the heroism of our POWs and say: You will never be forgotten. We will always remember the sacrifice and the heroism that you all have given to our Nation.

WATER INFRASTRUCTURE

The SPEAKER pro tempore. The Chair recognizes the gentleman from Oregon (Mr. BLUMENAUER) for 5 minutes.

Mr. BLUMENAUER. Mr. Speaker, from the moment I arrived in Congress, I have been working to rebuild and renew America. Our great country, sadly, is falling apart as it falls behind the rest of the world. The American Society of Civil Engineers rates our infrastructure as failing.

I have worked to develop a plan, a vision for infrastructure for this century because people have forgotten our history and are woefully uninformed about the nature of the challenge we face and the opportunities to do it right.

This doesn't need to be a partisan fight in Congress. Indeed, infrastructure used to be much more central to our mission in Congress, dating back to the postal roads mandated by the Constitution to President Eisenhower's interstate freeway system.

I welcome the administration's proposal for an oil fee to invest in green infrastructure. I truly believe that President Obama is committed to investing in infrastructure. He understands its value, and he has worked to include some infrastructure investment in the Recovery Act. I think we all know that it actually should have been much larger than it was; but, nonetheless, was very helpful.

The President has proposed things Congress after Congress that would fund a grander vision. Unfortunately, in the context of this Congress, they were not realistic. They had no chance of passing, probably regardless of who has control, given the nature of those proposals.

Nonetheless, I welcome the administration's proposal for a \$10 per barrel fee on oil to finance green infrastructure because of the timing at this point of incredibly low gas prices, flirting with \$1 a gallon, high oil production, a swollen inventory. Thirty dollars per barrel has become the benchmark.

Unfortunately, the new proposal was launched, as near as I can tell, without consultation with people in either party or the organizations that deal with infrastructure. It was not met with organized support on behalf of the vast array of individuals and organizations who are deeply committed to rebuilding and renewing America. It simply begs the question: Why not just raise the gas tax?

The proposal I have introduced to raise the gas tax was widely supported by business, labor, professions, local government, environmentalists; indeed, it was supported by the widest collection of interest groups supporting any major initiative before Congress. When you get the truckers and AAA both saying, "Raise taxes on motorists and truck drivers," that is a signal.

The proposal does not have the gaps associated with an oil fee that would impose challenges on consumers of oil, like school buses or home heating, and it does provoke the petroleum industry, which has accepted reasonable gas taxes, but would oppose an oil fee.

This is, however, an opportunity for us to revisit the need for investment in infrastructure, now that the administration has signaled its comfort with raising taxes on people who make under \$250,000 a year. The oil fee would be the equivalent of 20 to 25 cents a gallon—far more than the model proposal I had to phase in a 15-cent per gallon increase over 3 years.

Maybe we can reengage the conversation about raising the gas tax. After 24 years, we might follow the lead of President Reagan, who led an effort to raise the gas tax in 1983. After we raise the gas tax, we should index it and
