

PROVIDING FOR THE PRINTING OF A REVISED EDITION OF THE RULES AND MANUAL OF THE HOUSE OF REPRESENTATIVES FOR THE ONE HUNDRED FIFTEENTH CONGRESS

Mr. MCCARTHY. Mr. Speaker, I send to the desk a resolution and ask unanimous consent for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER pro tempore (Mr. KATKO). Is there objection to the request of the gentleman from California?

There was no objection.

The text of the resolution is as follows:

H. RES. 945

Resolved, That a revised edition of the Rules and Manual of the House of Representatives for the One Hundred Fifteenth Congress be printed and bound for the use of the House of Representatives, of which nine hundred eighty copies shall be bound in leather with thumb index and delivered as may be directed by the Parliamentarian of the House.

The resolution was agreed to.

A motion to reconsider was laid on the table.

DIRECTING THE CLERK OF THE HOUSE OF REPRESENTATIVES TO MAKE A CORRECTION IN THE ENROLLMENT OF H.R. 34

Mr. UPTON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the concurrent resolution (H. Con. Res. 174) directing the Clerk of the House of Representatives to make a correction in the enrollment of H.R. 34, with the Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The Clerk will report the Senate amendment.

The Clerk read as follows:

Senate amendment:

Beginning on page 1, line 7, strike "following correction:" and all that follows and insert the following:

"following corrections:

"(1) Amend the long title so as to read: 'An Act to accelerate the discovery, development, and delivery of 21st century cures, and for other purposes.'"

"(2) Amend the section heading for section 1001 so as to read: 'BEAU BIDEN CANCER MOONSHOT AND NIH INNOVATION PROJECTS'."

"(3) Amend the table of contents in section 1 so that the item relating to section 1001 reads as follows:

"'1001. Beau Biden Cancer Moonshot and NIH innovation projects.'"

Mr. UPTON (during the reading). Mr. Speaker, I ask unanimous consent to dispense with the reading.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The SPEAKER pro tempore. Is there objection to the original request of the gentleman from Michigan?

There was no objection.

A motion to reconsider was laid on the table.

BIG TEN CHAMPION PENN STATE NITTANY LIONS

(Mr. THOMPSON of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I rise to recognize the Big Ten football champions, the Penn State Nittany Lions.

Following a series of impressive victories that stunned the Nation, Penn State, my alma mater, finished the regular season ranked fifth in the Nation.

After falling behind to Wisconsin 28-14 at halftime, Penn State's chances to take home the Big Ten trophy looked bleak; but under the leadership of Big Ten Coach of the Year James Franklin, the Nittany Lions rallied to score 24 points in the second half to win the Big Ten championship. Throughout the game, they showed grit, determination, and sportsmanship, making me proud to be a fellow Penn Stater.

Congratulations to the Nittany Lions on an impressive season, and I wish you the best of luck in the Rose Bowl.

We are.

HOUSING DISCRIMINATION LAWSUIT AGAINST FANNIE MAE

(Ms. KAPTUR asked and was given permission to address the House for 1 minute.)

Ms. KAPTUR. Mr. Speaker, I rise tonight in support of the housing discrimination lawsuit filed against the Federal National Mortgage Association yesterday, Monday, by the National Fair Housing Alliance and 20 local fair housing organizations across our Nation. The lawsuit properly alleges Fannie Mae purposely failed to maintain its foreclosed properties in African American and Latino neighborhoods to the same condition as it maintains properties in Caucasian neighborhoods. Over 20 cities were involved in this filing, and investigations revealed severe maintenance issues in communities of color, in contrast to Freddie Mac, which maintains its properties at a much higher standard in all neighborhoods.

With a net income of over \$45 billion over the last 2 years, Fannie Mae remains one of the largest issuers of single-family, mortgage-related securities. This year, Fannie Mae reported holding over 40 million foreclosed properties, many of which they do not maintain.

So why hasn't Fannie Mae maintained its foreclosed properties in African American and Latino communities? They certainly have enough profits to do so. May the judges rule in favor of Fannie Mae meeting its public

responsibilities to the communities of this country as soon as possible.

HONORING ERIC ELLSWORTH

(Mr. BISHOP of Utah asked and was given permission to address the House for 1 minute.)

Mr. BISHOP of Utah. Mr. Speaker, today I rise in honor of Utah Highway Patrol trooper and Brigham City resident Eric Ellsworth, who was killed on November 18 in the line of duty. Eric was selflessly working to ensure the safety of others on a rural road in Box Elder County when he was tragically struck by a car and died several days later of the wounds that he sustained.

In the days since his death, Eric's family, friends, and fellow troopers have honored his memory, recalling his love for his family, his passion for life, his kindness, and his faith.

Today, Mr. Speaker, we honor Eric for the courage that he demonstrated on a daily basis to protect the citizens of Utah. We are going to remember his heroic sacrifice and those of others like him who dedicate themselves to the safety of others, regardless of personal danger.

My prayers go out to Eric's wife, his sons, and his extended family during this very difficult time.

HONORING CHOCO GONZALEZ MEZA

(Mr. CASTRO of Texas asked and was given permission to address the House for 1 minute.)

Mr. CASTRO of Texas. Mr. Speaker, I rise today to honor the life and legacy of Choco Gonzalez Meza, a beloved mother, grandmother, and friend, who changed the face of Texas politics. Her recent passing is a tremendous loss not only for her family, but for so many throughout Texas and the Nation whose lives she touched.

Born in Coahuila, Mexico, Choco and her family immigrated to the United States when she was just 3 years old. She graduated from St. Mary's University in San Antonio and went on to hold a number of leadership positions throughout her career. Whether at non-profits like the YWCA, through public service as deputy assistant secretary at the Department of Housing and Urban Development, or in politics as Bexar County Democratic chair, Choco tirelessly fought for social justice and strove to create opportunity for marginalized groups.

Choco was truly a historic figure in Texas politics and a compassionate, selfless soul. We mourn her passing and are grateful for all she gave to our community in San Antonio and to our Nation's democracy.

DEFERRED ACTION FOR CHILDHOOD ARRIVALS PROGRAM

(Mr. O'ROURKE asked and was given permission to address the House for 1 minute.)

Mr. O'ROURKE. Mr. Speaker, this is Nesbly Nayeli Saenz. She lives in my community, where she is raising a 14-, an 11-, and a 6-year-old U.S. citizen family. She is actively involved in the success of our community. She works two jobs, and she recently came out with over 320 other El Pasoans to talk about the importance of ensuring that the DREAMers, 750,000 of our fellow Americans who were brought here to this country at a young age, are able to stay here. The uncertainty created by our President-elect's promise to end the DACA program is creating anxiety and fear for these DREAMers and may ultimately lead to their deportation, which will hurt not just those DREAMers and their families, it will hurt our country.

I ask the President-elect and I ask this Congress to do our jobs to provide that certainty to make sure that our laws reflect our values and that we keep wonderful Americans like Nesbly in our communities, in our country. It is going to be good for them, and it is going to be good for our country.

MAKE IT IN AMERICA

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2015, the gentleman from California (Mr. GARAMENDI) is recognized for 60 minutes as the designee of the minority leader.

Mr. GARAMENDI. Mr. Speaker, tonight I will continue on a quest that we have been challenged with for the last 7 years, and that is how to grow the American economy.

Coming out of the Great Recession, where we lost millions of jobs and some 2 million manufacturing jobs that were in addition to the previous 6 million that had been lost in the years ahead of the Great Recession, we searched for how to rebuild the American economy and the great manufacturing base that once was the foundation for economic growth and the foundation for the middle class. This quest takes us yet again to, really, something that most Americans do not consider as manufacturing.

Let me start with a very quick review of the project that we have been working on, which we call the Make It In America project, so that Americans can make it. Wouldn't we want all of our families to be able to make it in America, to be able to buy that house, to educate our kids, to take the vacation?

So the Make It In America project includes trade, about which there has been much discussion in these recent years, in the debates in the election process; tax policy, which we will be dealing with shortly, and I may touch on that just lightly today; energy policy; labor; education; research; and infrastructure.

These are some of the critical elements that we focus on when we talk about making it in America so that Americans can make it in America.

Today I want to talk about a couple of pieces of this that we normally don't

think about when we talk about manufacturing. So we will just put this up here and be reminded about American manufacturing.

Think of the American farmer. Is that manufacturing? Well, I don't know. You take sun, water, earth, seeds, effort, entrepreneurialism, and you make something called food. We are going to take it just a step beyond that, because part of the manufacturing in America really is the preparation of food for Americans; in other words, the producing of the food taken out of the field and prepared for sale to American families—some of it in the grocery stores, some of it now in farmer's markets. But the manufacturing of food is a huge industry.

It is also an industry that has enormous growth potential. We know that, for example, just in the Central Valley of California, which I represent—the Sacramento Valley and the San Joaquin Valley—there are 1,659 food and beverage manufacturing establishments that are part of that food chain: taking rice from the fields in my district to the brewery and producing something that many Americans want on a Sunday afternoon at the tailgate party before the football game, beer, or maybe it is from the vineyards to the winery, and then think about all of the other pieces that go into that. There is the package in which the six-pack is packed or the crate into which the bottles of wine are sent off to the local retail store.

All of those pieces are also expanded by the machinery that is in the winery or in the brewery or in the tomato factory. All of these are jobs. And in many cases, these are American manufacturing jobs way, way back in the chain that have produced the pump or the electric motor or the pipe or the vat into which all of these products would be manufactured. So when we talk about manufacturing in the food industry, which is usually ignored when we talk about manufacturing in America, we need to realize that it is a huge part of the American economy and the American manufacturing scene.

I was recently at one of the largest tomato packing plants in California, the CPC plant in Woodland, California, that produces every kind of tomato paste you might want, all of the tomato sauce, all of the salsa. You name it, it is manufactured there in a very complex environment in which, seasonally, there are 1,200 workers and, annually, 125 that are left to maintain, to improve the equipment, and to take care of any problems that occurred in that manufacturing process. There are also hundreds of employed truckers who then take those cases of tomato paste, put them on the truck, and ship them all the way across America, or put them on a train or put them in a container to be taken to the Port of Oakland and then shipped overseas.

So when you consider the agricultural industry, think beyond the farmer. Think to what one of the bosses at

a big winery in California told me as I was touring there a couple of years ago. When I was talking about manufacturing, he said: Hey, come. Let's take a look out the back of my office.

I said: Fine. Let's go.

He said: Do you see that?

I said: Yes. Those are huge tanks and pumps and all the rest.

He said: No. That is a manufacturing facility, and what we make is the best wine in the entire world.

Indeed, it was very, very good wine.

So when we talk about bringing manufacturing jobs back to America—and there has been much discussion, as Mr. Trump has gone off to a Carrier plant in Indiana—we ought to also think about food manufacturing, and that is something that is not going to disappear from the American scene because, hey, it is grown here in America, and it needs to be processed here in America.

I want to take this so that we understand the full extent of the potential here. And if we have these elements in place, we will be able to create a very significant number of jobs.

Trade policy, I am not going to get into that anymore, but this is a big piece of every trade deal: Will American agriculture, the farmers and the processors of those products, be able to trade into the international market? By and large, American agriculture has been precluded, through various trade deals of the past, from being able to reach its full potential in international trade.

I want to talk specifically about labor for a moment, and these are the statistics from the California Department of Labor Marketing and Information Division.

Between 2012 and 2022—so 4 of those years have already gone by—there will be, in California, 51,900 total openings in the food manufacturing sector. Some of those are replacements; 27,000 of those would be to replace people who are retiring and 24,000 will be new openings as the manufacturing of food expands. They are in every category you can imagine: packing and filling machine operators, cleaners of the vehicles and the equipment, inspectors, industrial machine mechanics, packers and packagers, drivers and sale workers, general operations, and managers. That is a huge number. There are almost 52,000 new jobs available just in the food processing sector of the California economy.

Now, we make policy around here in every one of these areas, and the policies can enhance the food industry in the United States and create even more jobs in the United States. I want to give one example, and this is a piece of legislation that we have introduced here in Congress. We call it the American Food for American Schools Act—American food for American schools. It is H.R. 6299.

Now, for years, we have had the School Lunch Act, providing nutritional food for kids at school, and the
