

And we need to get back to the Trump policies before we get overwhelmed. And going back to the point that Benjamin Franklin made: It takes work to keep a republic. It doesn't just happen. That is why it has happened so rarely. That is why the United States of America is such an anomaly in history.

There has never been a country like this. Even Solomon's Israel didn't have all of the individual opportunities, all of the individual assets and comforts that we have here in America. It is an amazing place, but it takes work. It takes education of our children, training them up so they understand what it takes to preserve a republic, a representative form of government, and getting stronger and stronger as we have done until more recent years.

When you have people flooding in, I mean, 2 million people this year, this administration has 3 more years, so are we going to have 8 million, at least 8 million more people enter this country illegally? They are not coming from countries that understand how to preserve a republic. And I will tell you some of the very best citizens we have in this whole country are people who went through the process of becoming legal citizens, and I hear from them a lot in my district.

They love America because they know how it can be outside of America, and they don't want our country becoming like those countries they came from. People from Venezuela, people from Central America, from Eastern Bloc countries are some of the best citizens we have got, some from Russia. My cousin married a Russian, and she knows. We were talking about it last week, and she is feeling a sense of urgency. We are losing what we have had. We are becoming more like the place I was so anxious to leave.

It takes work to keep a republic and to enjoy the blessings we have received. People who are flooding in, they have never been trained on what it takes to preserve a republic. And one of the big issues to so many people during the COVID pandemic has been the unprecedented grab of power that the Federal Government has never had before. Never. We have had pandemics that were a lot more deadly than COVID, but no one has ever had the nerve to tell people who were not infected, who had thriving businesses, that they had to close down their business. We are going to let these people open. We are not letting you open.

Thirty years ago, they would have opened anyway, probably 20 years ago, and they would have won in court without question. You can't shut down business. It is unprecedented. And for heaven's sake, to tell churches they couldn't open. For the huge majority of our history, when there was a time of emergency, including a pandemic, people felt like they needed to be in church praying; that they needed to be asking God for help. And for the first time in our history, we didn't have a President that issued a National Day of

Prayer & Fasting, asking God to help us. For the first time in our history, we had a national proclamation: You have got to close businesses. You have got to close churches. You can't meet. In some places States said you can't even sing in church because you open your mouth. We can't allow that.

And I know there are still a lot of mixed signals on masks. It is interesting. There are cloth masks. I had a mask getting on a plane with, one of the SHEMA97 masks designed in Israel. It has four layers of cloth that are ionized to kill germs. They don't just catch them. They will kill germs.

The flight attendant said: I can see your nose, so that mask can't be any good. It can't be any good, she says. And she was wearing one of the little blue-and-white masks. Talk about not doing any good. Although, in fairness, I have read that there were some studies that said those little blue-and-white masks can decrease your percentage of getting COVID by 0.2 percent. So 0.2 percent, that is what it is, great. Wear one of those little, cloth masks.

But then we see down in Florida that has been the most open, that they have fewer cases percentagewise. They are doing better than any other State in the country and they have been the most open State we have had. So it is interesting. And I have an article here from The Gateway Pundit. "It Wasn't Just Beagles and Monkeys—Fauci's NIH Also Funded Medical Experiments on AIDS Orphans in New York City."

I read somewhere else that these were Black orphans that had AIDS, and the Fauci NIH was doing experiments on them, according to this article of Jim Hoft. They reported that 25 children, those Black orphanage babies, died during the drug studies they were doing on those poor little babies. An additional 55 children died following the studies while they were in foster care. Tim Ross, director of the child welfare program at Vera—I am looking for what that stands for—the Vera Institute, that as of 2009, 29 percent of the remaining 417 children who were used in drug studies had died; 532 children that are admitted to have been used now.

□ 2140

That was in the last 20 years. I don't know if Dr. Fauci has been asked if he knew about that. We found out he lied about funding gain of function in China.

Another article from Fox Business, Elizabeth Faddis, that Dr. Fauci is facing a demand from lawmakers on both sides of the aisle to divulge information regarding the alleged use of an experimental drug on puppies.

I guarantee you, as more people find out that NIH was using orphan Black AIDS babies for drug experiments, that killed many of them, there will be even more cries from both sides of the aisle on answers. I thought we were so far past anything like that. I mean, after the outrageous Tuskegee experiments,

I can't believe we have been doing that same stuff in the last 20 years. Somebody needs to be held accountable for these things.

We are in deeply troubling times, and there is a good chance that if we don't get back to making sure children in America know how to sustain a republic, we are headed for losing it.

It is because of a fear of that, a fear of the loss of freedom, that caused me to leave the bench and run and try to get elected to Congress so I could make a difference in legislation, so we could try to salvage this little experiment in self-government. But it seems pretty clear it is not going to last much longer.

You can't absorb 8 million people, who not only most of them don't speak the language, but they are adults who have no clue, have never been educated. They have certainly got the capacity to learn, but they have never been educated on what it takes to preserve self-government and the blessings that we have in this country.

If they are not educated on that, if they are simply handed \$450,000 each, then that is all they know. Wow, this is a country where you come in, demand money, they give it to you. You can't sustain a country like that, and we won't. No one ever has.

In Rome, there was one Caesar that figured that bread and circuses were being given to keep people peaceable, and it was keeping them from working. He tried to do away with it. But by then, it was too late.

Let's act now before it is too late.

Mr. Speaker, I yield back the balance of my time.
