

Coast talk about some of the issues. It always amazes me that our issues are so aligned.

But specifically today I am going to talk a little bit about water. So in communities like the Central Valley, Federal permitting requirements, coupled with the State's strict environmental regulations make it harder for our communities to get the water they so desperately need.

Increasing water storage capacity is critical to ensuring a reliable water supply for our valley farmers that feed the country. Unfortunately, our broken permitting process prevents many of these critical water infrastructure projects from ever getting off the ground.

We need to fix complex and contradictory laws, court decisions, and regulations at the State and Federal levels that hinder our water storage infrastructure.

Layers of unnecessary bureaucracy and red tape in permitting decisions have blocked much of the needed progress on a long list of projects, from water storage, to energy production, to highways.

The government red tape in permitting is not only affecting water storage, it is also having a devastating effect on our Nation's energy supply.

There is a backlog of over 4,600 permits to drill pending under the Biden administration, and even though Federal law requires approval of the permits on Federal lands within 30 days, permits often languish at the Department of the Interior for a year or more.

This government red tape is hurting families in the Central Valley and across the country in the form of higher gas prices. It is time for the government bureaucracy to get out of the way so we can once again become energy independent.

There is no reason that streamlining the Federal permitting process should be a controversial issue. Rural communities like the one I represent are tired of burdensome government regulations holding them back. Greater efficiency in the Federal permitting process is critical for getting water to those in the Central Valley that need it most.

And as we saw, from other colleagues that spoke before us, this isn't just a California issue. And I know that the chairman here, Mr. NEWHOUSE and I, our districts are a lot alike. We both grow a lot of different commodities, and we are proud of our districts. But we both need something that makes it all possible, and that is water and energy.

I thank the gentleman for his leadership on these important issues and thank him for giving me the opportunity.

Mr. NEWHOUSE. Madam Speaker, the gentleman is right. What is more precious than water? And those of us in the West understand that very well.

So, Madam Speaker, let me just say I am very grateful to have colleagues from across this great country join me

tonight to talk about these issues, and to discuss our efforts in the Western Caucus as it relates to permitting month.

□ 2015

As you have heard, the broken processes surrounding permitting throughout the Federal Government have truly kneecapped our rural communities. This has slowed progress and has cost millions and millions of dollars.

In order to truly unleash American potential, we have to reform this process, and we will. Between the Western Caucus and those of us in Congress, we will continue to advocate for common-sense policies that are going to do just that.

Madam Speaker, I am grateful for the Special Order opportunity this evening, and I yield back the balance of my time.
