

childhood and then adjust, and not have the physical horrors that these surgeries cause.

I was deeply moved by Chloe Cole. She is a beautiful person. She was very unfortunate in having people think they knew better and encouraging her to take steps that she should not have taken, as she will tell you now.

We are supposed to be the ones that are mature and help children avoid going through horrors, and, yet, we have even got States passing laws—don't you dare help this child. Let's help the child go through genital mutilation, even though it will be his or her body.

As Dr. McHugh has pointed out and studies have pointed out, you can go through sex change surgery or gender reassignment surgery—whatever you want to call it—DNA-wise, biologically, you are still the same gender you were before the surgery, and your DNA will remain the same.

Now, who knows, I read a Swedish study this year about the mRNA vaccines. It was interesting, it says there is radiation at the point of the injection, and more radiation found in the liver after the vaccination with the mRNA vaccines. But the study documented that they found that the mRNA ends up going to the liver and rewriting the body's DNA for them. We don't know where all that is going to end up, but it certainly doesn't appear to be going a good direction.

I have got no problem with people continuing to get the vaccinations and the boosters, I think that is fine, so long as the wonderful doctrine that we developed making healthcare better than it has been in the history of the world, called informed consent.

That doctrine that requires that a physician or healthcare provider advise the patient of all the potential risks of a vaccination, treatment, surgery, whatever, and then letting them talk to their doctor and making their own mind up about whether or not to go through with it.

If we could do that, and I would submit, also allow the healthcare providers and the pharmaceuticals to be liable for any damage that they cause if they don't allow informed consent and allow the individual to make up his or her mind, unless it is a minor. We don't allow minors to make decisions normally unless it is in the sick area of genital mutilation that I was just talking about.

If pharmaceuticals are that excited about continuing to make tens of billions of dollars providing vaccinations, vaccines, great, just stand good for whatever damages you cause. It sure seems like that would be the right thing to do.

I won't have time to get to it, but this article from Jennifer Margulis and Joe Wang, *The Epoch Times*, September 10, the headline is, "Unethical" and up to 98 Times Worse Than the Disease: Top Scientists Publish Paradigm-Shifting Study About COVID-19 Vaccines."

It points out the boosters for young people may cause 18 to 98 actual serious adverse events for each COVID-19 infection-related hospitalization theoretically prevented. So for each hospitalization prevented, they are saying 18 to 98 actual serious consequences to the body will result.

It is going to be an interesting week next week. I look forward to seeing what more damage that Congress can do to our economy, to our country. I hope that people, Mr. Speaker, will let their Members of Congress know what they agree with and what they disagree with.

Mr. Speaker, I yield back the balance of my time.
