STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Ms. COLLINS (for herself and Ms. CANTWELL):

S. 4420. A bill to provide for advancements in carbon removal research, quantification, and commercialization, including by harnessing natural processes, and for other purposes; to the Committee on Energy and Natural Resources.

Ms. COLLINS. Mr. President, I rise today to introduce the Carbon Removal and Emissions Storage Technologies Act, the CREST Act. I am pleased to be partnering with Senator CANTWELL on this bill. Our bipartisan bill would direct the Department of Energy to research and evaluate the feasibility of innovative carbon removal and storage pathways. The name the CREST Act alludes to the fact that we have reached the "crest" of our emissions and we must work to bring them down.

With more and more private and public sector commitments to reach net-zero emissions within certain timeframes, companies are scrambling to invest in quantifiable, durable, and verifiable carbon removal solutions. Microsoft, for example, has made a commitment to be carbon negative by 2030. Even though Microsoft plans to reduce its greenhouse gas emissions by more than half, it will need to remove the rest of its carbon emissions. In order to do this, Microsoft plans to invest \$1 billion in carbon removal technologies, such as direct air capture, forestation, and carbon mineralization.

Despite the growing number of companies that are looking to offset their emissions, current cost estimates show that private sector investment alone will not be sufficient to research and deploy carbon removal pathways. I strongly supported the Energy Act of 2020, which authorized the first comprehensive Federal carbon removal research and development program, and the bipartisan infrastructure, which invested \$3.6 billion in direct air capture. Although these investments have been significant, more work is needed in further research, increased testing, and enhanced public-private partnerships to help aid in scaling carbon removal technologies.

The CREST Act would expand the Department of Energy's carbon removal research and development programs to include carbon removal pathways that can permanently sequester carbon dioxide or use carbon dioxide to produce biofuels or products. The key areas of focus for research and development in our legislation are biomass carbon removal and storage, geological removal, atmospheric and aquatic removal, carbon dioxide storage, and carbon dioxide removal quantification.
