

a result of the underlying bill we would come to homes and take away their gas stoves.

This would create a hazard. This would create a hazard, and this amendment should not be adopted.

Mr. Chairman, I reserve the balance of my time.

Mrs. BOEBERT. Mr. Chairman, may I ask how much time I have remaining.

The CHAIR. The gentlewoman from Colorado has 1½ minutes remaining.

Mrs. BOEBERT. Mr. Chairman, what makes no sense is the speech that we just heard regarding this amendment. There is so much of that that I cannot even fathom to put together.

I am hearing a lot about hazards from gas stoves that would cause harm for our children. I have four children. We have always had a gas stove, and they are doing pretty well.

I can see that the gentlewoman from Illinois has made it pretty long in her lifetime with the so-called dangers of gas products here in America.

Mr. Chairman, let me tell you what really is hazardous. What really is dangerous is the Green New Deal extremism that comes from the left because they want to suppress our good, clean energy right here in the United States of America that is cheap, that is reliable, and it is actually something that is affordable for Americans right now, unlike everything else because of the inflation that we are seeing from this administration.

What is hazardous and what is really dangerous are the tens of thousands of children who are mining for cobalt in Chinese-owned mines in the Congo with their bare hands. That is what is dangerous, and that is what this Green New Deal extremist policy encourages and pushes.

I have voted on so many bills for the Uighurs that are suppressed by the Chinese, but we never talk about the slave labor that takes place to produce the energy that the other side is trying to force on Americans with their overreach of government policy. That is what is dangerous.

□ 1700

An open border with fentanyl pouring over, that is dangerous. Families not being able to afford to feed their family, that is dangerous.

Mr. Chair, I urge the adoption of this bill that makes so much more sense than the speech that we just heard from the other side of the aisle.

Mr. Chair, I yield back the balance of my time.

Ms. SCHAKOWSKY. Mr. Chair, I don't know how the gentlewoman got to children in mines from an amendment that says that any kind of addition to manufacturing a gas stove, including lead, which the gentlewoman did not respond to, would be a danger.

I oppose this amendment. I think it is very harmful. It has nothing to do with many of the scenarios that were just illuminated or not, and I think that it is very important that we vote down this very dangerous amendment.

Mr. Chair, I yield back the balance of my time.

The Acting CHAIR (Mr. MAST). The question is on the amendment offered by the gentlewoman from Colorado (Mrs. BOEBERT).

The question was taken; and the Acting Chair announced that the ayes appeared to have it.

Ms. SCHAKOWSKY. Mr. Chair, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentlewoman from Colorado will be postponed.

The Chair understands that amendment No. 2 will not be offered.

Mr. BILIRAKIS. Mr. Chair, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. McCORMICK) having assumed the chair, Mr. MAST, Acting Chair of the Committee of the Whole House on the state of the Union, reported that that Committee, having had under consideration the bill (H.R. 1615) to prohibit the use of Federal funds to ban gas stoves, had come to no resolution thereon.
