

time that fossil fuel companies pay their fair share and do their part to clean up after their actions.

Mr. Speaker, I urge my colleagues to oppose this bill.

Ms. KAMLAGER-DOVE. Mr. Speaker, I yield myself the balance of my time to close.

Republicans have claimed that H.R. 1, their polluters over people bill, would solve all of our Nation's energy problems and that it is their number one priority for this Congress.

Lately, some of them have even started saying that Senate Democrats and Leader SCHUMER are letting this legislation gather dust on the other side of the Capitol. Let's just fact-check. I love doing it. It is false.

The truth is that the do-nothing Republican House hasn't even sent H.R. 1 to the Senate. Despite passing in the House a year ago, this bill has never been transmitted to the Senate and has languished in limbo with Republican leadership, gathering dust first on Speaker McCarthy's desk, then on nobody's desk, and now on Speaker JOHN-SON'S desk.

If Republicans are so proud of their energy policies for the American people, why are they burying their landmark legislation and trying to blame Democrats? Why are we here passing sections of H.R. 1 for the second time? It is because it is all show.

The do-nothing Republican House has no real solution. Instead of taking real action to invest in a cleaner and safer energy future for every American, House Republicans are just repeating the same stale, tired arguments and passing the same washed-up bills over and over again, fully knowing that these messaging bills aren't going anywhere.

The American people deserve better.

I reiterate that this Republican legislation is a messaging bill that, fortunately, is going nowhere. House Republicans should be doing the bare minimum work this week of funding the government and keeping the lights on. Instead, they are trying to win political points with people's lives and livelihoods on the line.

This legislation creates unacceptable risk, and the President should have every single tool to protect public health and the environment.

Mr. Speaker, I oppose this bill, and I yield back the balance of my time.

Mr. STAUBER. Mr. Speaker, I yield myself the balance of my time to close.

Mr. Speaker, the American people just have to ask themselves whether they are paying more or less for energy and groceries under this administration. It is clear the American people are suffering under the Biden policies.

The Biden administration's proposed rule would eliminate the opportunity for exploration of newly discovered energy producing areas and shrink future oil and gas production, even on sites

where it already exists, all while drastically driving up costs for Americans.

We will not stand by idly as this administration locks up our Federal lands and prohibits Americans from accessing their abundant natural resources. We will support American families, jobs, communities, our economy, and our national security through safe, clean, and efficient domestic energy production.

Mr. Speaker, I urge all of my colleagues to join me in support of H.R. 6009, and I yield back the balance of my time.

The SPEAKER pro tempore. All time for debate has expired.
