

**DATES:** The notice of proposed rulemaking is withdrawn on May 15, 2007.

**FOR FURTHER INFORMATION CONTACT:** Mr. Barry Dragon, Project Officer, Seventh Coast Guard District, Bridge Branch, at (305) 415-6743.

**SUPPLEMENTARY INFORMATION:**

**Background**

On April 3, 2006, we published a notice of proposed rulemaking entitled "Drawbridge Operation Regulations; Little River (S-20) Bridge, Atlantic Intracoastal Waterway Mile 347.3, Horry County, SC" in the *Federal Register* (71 FR 16527). The rulemaking concerned changing the current "on demand" schedule to an on the hour, twenty minutes past the hour and forty minutes past the hour schedule.

**Withdrawal**

A new high level fixed bridge was constructed within close proximity of the moveable bridge, thereby providing an alternative for existing traffic and allowing for a reduction of vehicular traffic on the moveable bridge. The Little-River Bridge crosses the Atlantic Intracoastal Waterway and has an average of fewer than two openings per hour. Additionally, all of the comments received during the comment period of the notice of proposed rulemaking were in favor of keeping the current "on demand" schedule.

**Authority:** This action is taken under the authority of 33 U.S.C. 499; Department of Homeland Security Delegation No. 0170.1; 33 CFR 1.05-1(g); section 117.255 also issued under the authority of Pub. L. 102-587, 106 Stat. 5039.

Dated: September 19, 2006.

**J.A. Watson,**

*Captain, U.S. Coast Guard, Acting Commander, Seventh Coast Guard District.*

**Editorial Note:** This document was received at the Office of the Federal Register on May 10, 2007.

**Approval and Promulgation of Air Quality Implementation Plans; Pennsylvania; Redesignation of the Lancaster 8-Hour Ozone Nonattainment Area to Attainment and Approval of the Associated Maintenance Plan and 2002 Base-Year Inventory**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** EPA is proposing to approve a redesignation request and State Implementation Plan (SIP) revisions submitted by the Commonwealth of Pennsylvania. The Pennsylvania Department of Environmental Protection (PADEP) is requesting that the Lancaster ozone nonattainment area ("Lancaster Area" or "Area") be redesignated as attainment for the 8-hour ozone national ambient air quality standard (NAAQS). The Area is comprised of Lancaster County, Pennsylvania. EPA is proposing to approve the ozone redesignation request for the Lancaster Area. In conjunction with its redesignation request, the Commonwealth submitted a SIP revision consisting of a maintenance plan for the Lancaster Area that provides for continued attainment of the 8-hour ozone NAAQS for 11 years after redesignation. EPA is proposing to make a determination that the Lancaster Area has attained the 8-hour ozone NAAQS, based upon three years of complete, quality-assured ambient air quality monitoring data for 2003-2005. EPA's proposed approval of the 8-hour ozone redesignation request is based on its determination that the Lancaster Area has met the criteria for redesignation to attainment specified in the Clean Air Act (CAA). In addition, the Commonwealth of Pennsylvania has also submitted a 2002 base-year inventory for the Lancaster Area, and EPA is proposing to approve that inventory for the Lancaster Area as a SIP revision. EPA is also providing information on the status of its adequacy determination for the motor vehicle emission budgets (MVEBs) that are identified in the maintenance plan for the Lancaster Area for purposes of transportation conformity, and is also proposing to approve those MVEBs. EPA is proposing approval of the redesignation request and of the maintenance plan and 2002 base-year

inventory SIP revisions in accordance with the requirements of the CAA.

**DATES:** Written comments must be received on or before June 14, 2007.

**ADDRESSES:** Submit your comments, identified by Docket ID Number EPA-R03-OAR-2006-0840 by one of the following methods:

A. *www.regulations.gov.* Follow the on-line instructions for submitting comments.

B. *E-mail:* miller.linda@epa.gov.

C. *Mail:* EPA-R03-OAR-2006-0840, Linda Miller, Acting Chief, Air Quality Planning Branch, Mailcode 3AP21, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103.

D. *Hand Delivery:* At the previously-listed EPA Region III address. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

*Instructions:* Direct your comments to Docket ID No. EPA-R03-OAR-2006-0840. EPA's policy is that all comments received will be included in the public docket without change, and may be made available online at <http://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through [www.regulations.gov](http://www.regulations.gov) or e-mail. The [www.regulations.gov](http://www.regulations.gov) Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through [www.regulations.gov](http://www.regulations.gov), your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

*Docket:* All documents in the electronic docket are listed in the [www.regulations.gov](http://www.regulations.gov) index. Although listed in the index, some information is

not publicly available, i.e., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in [www.regulations.gov](http://www.regulations.gov) or in hard copy during normal business hours at the Air Protection Division, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103. Copies of the State submittal are available at the Pennsylvania Department of Environmental Protection, Bureau of Air Quality Control, P.O. Box 8468, 400 Market Street, Harrisburg, Pennsylvania 17105.

**FOR FURTHER INFORMATION CONTACT:** Ellen Wentworth, (215) 814-2034, or by e-mail at [wentworth.ellen@epa.gov](mailto:wentworth.ellen@epa.gov).

**SUPPLEMENTARY INFORMATION:**

Throughout this document whenever “we,” “us,” or “our” is used, we mean EPA.

**I. What Are the Actions EPA Is Proposing To Take?**

On September 20, 2006, as supplemented on November 8, 2006, the PADEP formally submitted a request to redesignate the Lancaster Area from nonattainment to attainment of the 8-hour NAAQS for ozone. Concurrently, Pennsylvania submitted a maintenance plan for the Lancaster Area as a SIP revision to ensure continued attainment in the Area for at least 11 years after redesignation. PADEP also submitted a 2002 base-year inventory for the Lancaster Area as a SIP revision. The Lancaster Area is comprised of the County of Lancaster. It is currently designated a marginal 8-hour ozone nonattainment area. EPA is proposing to determine that the Lancaster Area has attained the 8-hour ozone NAAQS and that it has met the requirements for redesignation pursuant to section

107(d)(3)(E) of the CAA. EPA is, therefore, proposing to approve the redesignation request to change the designation of the Lancaster Area from nonattainment to attainment for the 8-hour ozone NAAQS. EPA is also proposing to approve the Lancaster maintenance plan as a SIP revision for the Area (such approval being one of the CAA criteria for redesignation to attainment status). The maintenance plan is designed to ensure continued attainment in the Lancaster Area for the next 11 years. EPA is also proposing to approve the 2002 base-year inventory for the Lancaster Area as a SIP revision. Additionally, EPA is announcing its action on the adequacy process for the MVEBs identified in the Lancaster Area maintenance plan, and proposing to approve the MVEBs identified for volatile organic compounds (VOCs) and nitrogen oxides (NO<sub>x</sub>) for the Lancaster Area for transportation conformity purposes.

**II. What Is the Background for These Proposed Actions?**

*A. General*

Ground-level ozone is not emitted directly by sources. Rather, emissions of NO<sub>x</sub> and VOC react in the presence of sunlight to form ground-level ozone. The air pollutants NO<sub>x</sub> and VOC are referred to as precursors of ozone. The CAA establishes a process for air quality management through the attainment and maintenance of the NAAQS.

On July 18, 1997, EPA promulgated a revised 8-hour ozone standard of 0.08 parts per million (ppm). This new standard is more stringent than the previous 1-hour standard. EPA designated, as nonattainment, any area violating the 8-hour ozone NAAQS based on the air quality data for the three years of 2001–2003. These were the most recent three years of data at the time EPA designated 8-hour areas. The Lancaster Area was designated a moderate 8-hour ozone nonattainment area in a **Federal Register** notice signed on April 15, 2004 and published on April 30, 2004 (69 FR 23857), based on its exceedance of the 8-hour health-based standard for ozone during the years 2001–2003. In July 2004, Pennsylvania requested that the EPA reclassify the Lancaster Area to a “marginal” 8-hour ozone nonattainment Area in accordance with section 181(a)(4) of the CAA, which allows a state to request reclassification if the design value in the nonattainment area is five percent greater or five percent less than the level on which the classification is based. The Lancaster Area was reclassified by EPA as a

“marginal” 8-hour ozone nonattainment area on September 22, 2004 (69 FR 56697).

On April 30, 2004, EPA issued a final rule (69 FR 23951, 23996) to revoke the 1-hour ozone NAAQS in the Lancaster Area (as well as most other areas of the country) effective June 15, 2005. See 40 CFR 50.9(b); 69 FR at 23996 (April 30, 2004); 70 FR 44470 (August 3, 2005).

However, on December 22, 2006, the U.S. Court of Appeals for the District of Columbia Circuit vacated EPA’s Phase 1 Implementation Rule for the 8-hour Ozone Standard, (69 FR 23951, April 30, 2004). See *South Coast Air Quality Management Dist. v. EPA*, 472 F.3d 882 (D.C. Cir. 2006) (hereafter “*South Coast*”). The Court held that certain provisions of EPA’s Phase 1 Rule were inconsistent with the requirements of the Clean Air Act. The Court rejected EPA’s reasons for implementing the 8-hour standard in nonattainment areas under subpart 1 in lieu of subpart 2 of Title I, part D of the Act. The Court also held that EPA improperly failed to retain four measures required for 1-hour nonattainment areas under the anti-backsliding provisions of the regulations: (1) Nonattainment area New Source Review (NSR) requirements based on an area’s 1-hour nonattainment classification; (2) Section 185 penalty fees for 1-hour severe or extreme nonattainment areas; (3) measures to be implemented pursuant to section 172(c)(9) or 182(c)(9) of the Act, on the contingency of an area not making reasonable further progress toward attainment of the 1-hour NAAQS, or for failure to attain that NAAQS; and (4) the certain conformity requirements for certain types of federal actions. The Court upheld EPA’s authority to revoke the 1-hour standard provided there were adequate anti-backsliding provisions. Elsewhere in this document, mainly in section VI.B, “The Lancaster Area Has Met All Applicable Requirements Under Section 110 and Part D of the CAA and Has a Fully Approved SIP Under Section 110(k) of the CAA,” EPA discusses its rationale why the decision in *South Coast* is not an impediment to redesignating the Lancaster Area to attainment of the 8-hour ozone NAAQS.

The CAA, title I, part D, contains two sets of provisions—subpart 1 and subpart 2—that address planning and control requirements for nonattainment areas. Subpart 1 (which EPA refers to as “basic” nonattainment) contains general, less prescriptive requirements for nonattainment areas for any pollutant—including ozone—governed by a NAAQS. Subpart 2 (which EPA refers to as “classified” nonattainment) provides more specific requirements for

ozone nonattainment areas. Some 8-hour ozone nonattainment areas are subject only to the provisions of subpart 1. Other areas are also subject to the provisions of subpart 2. Under EPA's 8-hour ozone implementation rule, an area was classified under subpart 2 based on its 8-hour ozone design value (*i.e.*, the 3-year average annual fourth-highest daily maximum 8-hour average ozone concentration), if it had a 1-hour design value at or above 0.121 ppm (the lowest 1-hour design value in the CAA for subpart 2 requirements). All other areas were covered under subpart 1, based upon their 8-hour design values. In 2004, the Lancaster Area was classified a marginal 8-hour ozone nonattainment area based on air quality monitoring data from 2001–2003. Therefore, the Lancaster Area is subject to the requirements of subpart 2 of part D.

Under 40 CFR part 50, the 8-hour ozone standard is attained when the 3-year average of the annual fourth-highest daily maximum 8-hour average ambient air quality ozone concentrations is less than or equal to 0.08 ppm (*i.e.*, 0.084 ppm when rounding is considered). *See* 69 FR 23857, (April 30, 2004) for further information. Ambient air quality monitoring data for the 3-year period must meet data completeness requirements. The data completeness requirements are met when the average percent of days with valid ambient monitoring data is greater than 90 percent, and no single year has less than 75 percent data completeness as determined in Appendix I of 40 CFR part 50. The ozone monitoring data indicates that the Lancaster Area has a design value of 0.083 ppm for the 3-year period of 2003–2005, using complete, quality-assured data. Therefore, the ambient ozone data for the Lancaster Area indicates no violations of the 8-hour ozone standard.

#### B. The Lancaster Area

The Lancaster Area consists of the County of Lancaster, Pennsylvania. Prior to its designation as an 8-hour ozone nonattainment area, the Lancaster Area was a marginal 1-hour ozone nonattainment Area, and therefore was subject to requirements for marginal nonattainment areas pursuant to section 182(a) of the CAA. *See* 56 FR 56694 (November 6, 1991).

On September 20, 2006 and supplemented on November 8, 2006, the PADEP requested that the Lancaster Area be redesignated to attainment for the 8-hour ozone standard. The redesignation request included three years of complete, quality-assured data

for the period of 2003–2005, indicating that the 8-hour NAAQS for ozone had been achieved in the Lancaster Area. The data satisfies the CAA requirements that the 3-year average of the annual fourth-highest daily maximum 8-hour average ozone concentration (commonly referred to as the area's design value), must be less than or equal to 0.08 ppm (*i.e.*, 0.084 ppm when rounding is considered). Under the CAA, a nonattainment area may be redesignated if sufficient complete, quality-assured data is available to determine that the area has attained the standard and the area meets the other CAA redesignation requirements set forth in section 107(d)(3)(E).

#### III. What Are the Criteria for Redesignation to Attainment?

The CAA provides the requirements for redesignating a nonattainment area to attainment. Specifically, section 107(d)(3)(E) of the CAA, allows for redesignation, providing that:

- (1) EPA determines that the area has attained the applicable NAAQS;
- (2) EPA has fully approved the applicable implementation plan for the area under section 110(k);
- (3) EPA determines that the improvement in air quality is due to permanent and enforceable reductions in emissions resulting from implementation of the applicable SIP and applicable Federal air pollutant control regulations and other permanent and enforceable reductions;
- (4) EPA has fully approved a maintenance plan for the area as meeting the requirements of section 175A; and
- (5) The State containing such area has met all requirements applicable to the area under section 110 and part D.

EPA provided guidance on redesignations in the General Preamble for the Implementation of Title I of the CAA Amendments of 1990, on April 16, 1992 (57 FR 13498), and supplemented this guidance on April 28, 1992 (57 FR 18070). EPA has provided further guidance on processing redesignation requests in the following documents:

- “Ozone and Carbon Monoxide Design Value Calculations,” Memorandum from Bill Laxton, June 18, 1990;
- “Maintenance Plans for Redesignation of Ozone and Carbon Monoxide Nonattainment Areas,” Memorandum from G.T. Helms, Chief, Ozone/Carbon Monoxide Programs Branch, April 30, 1992;
- “Contingency Measures for Ozone and Carbon Monoxide (CO) Redesignations,” Memorandum from G.T. Helms, Chief, Ozone/Carbon

Monoxide Programs Branch, June 1, 1992;

- “Procedures for Processing Requests to Redesignate Areas to Attainment,” Memorandum from John Calcagni, Director, Air Quality Management Division, September 4, 1992;
- “State Implementation Plan (SIP) Actions Submitted in Response to Clean Air Act (Act) Deadlines,” Memorandum from John Calcagni Director, Air Quality Management Division, October 28, 1992;
- “Technical Support Documents (TSDs) for Redesignation Ozone and Carbon Monoxide (CO) Nonattainment Areas,” Memorandum from G.T. Helms, Chief, Ozone/Carbon Monoxide Programs Branch, August 17, 1993;
- “State Implementation Plan (SIP) Requirements for Areas Submitting Requests for Redesignation to Attainment of the Ozone and Carbon Monoxide (CO) National Ambient Air Quality Standards (NAAQS) on or after November 15, 1992,” Memorandum from Michael
  - H. Shapiro, Acting Assistant Administrator for Air and Radiation, September 17, 1993;
  - Memorandum from D. Kent Berry, Acting Director, Air Quality Management Division, to Air Division Directors, Regions 1–10, “Use of Actual Emissions in Maintenance Demonstrations for Ozone and CO Nonattainment Areas,” dated November 30, 1993;
  - “Part D New Source Review (part D NSR) Requirements for Areas Requesting Redesignation to Attainment,” Memorandum from Mary D. Nichols, Assistant Administrator for Air and Radiation, October 14, 1994; and
  - “Reasonable Further Progress, Attainment Demonstration, and Related Requirements for Ozone Nonattainment Areas Meeting the Ozone National Ambient Air Quality Standard,” Memorandum from John S. Seitz, Director, Office of Air Quality Planning and Standards, May 10, 1995.

#### IV. Why Is EPA Taking These Actions?

On September 20, 2006, the PADEP requested redesignation of the Lancaster Area to attainment for the 8-hour ozone standard. On September 20, 2006, as supplemented on November 8, 2006, PADEP submitted a maintenance plan for the Lancaster Area as a SIP revision to ensure continued attainment at least 11 years after redesignation. PADEP also submitted a 2002 base-year inventory concurrently with its maintenance plan as a SIP revision, which is an applicable requirement for the Lancaster Area for

purposes of redesignation. EPA has determined that the Lancaster Area has attained the 8-hour ozone standard and has met the requirements for redesignation set forth in section 107(d)(3)(E).

**V. What Would Be the Effect of These Actions?**

Approval of the redesignation request would change the official designation of the Lancaster Area from nonattainment to attainment for the 8-hour ozone NAAQS found at 40 CFR part 81. It would also incorporate into the Pennsylvania SIP a 2002 base-year inventory and a maintenance plan ensuring continued attainment of the 8-hour ozone NAAQS in the Lancaster Area for the next 11 years. The maintenance plan includes contingency measures to remedy any future violations of the 8-hour NAAQS (should they occur), and identifies the NO<sub>x</sub> and VOC MVEBs for transportation conformity purposes for the years 2009 and 2018. These MVEBs are displayed in the following table:

**TABLE 1.—MOTOR VEHICLE EMISSIONS BUDGETS IN TONS PER DAY (TPD)**

Year	VOC	NO <sub>x</sub>
2009 .....	14.3	22.3
2018 .....	7.8	9.0

**VI. What Is EPA’s Analysis of the Commonwealth’s Request?**

EPA is proposing to determine that the Lancaster Area has attained the 8-hour ozone standard, and that all other redesignation criteria have been met. The following is a description of how the PADEP’s September 20, 2006 and November 8, 2006 submittals satisfy the requirements of section 107(d)(3)(E) of the CAA.

*A. The Lancaster Area Has Attained the 8-Hour Ozone NAAQS*

EPA is proposing to determine that the Lancaster Area has attained the 8-hour ozone NAAQS. For ozone, an area may be considered to be attaining the 8-hour ozone NAAQS if there are no violations, as determined in accordance with 40 CFR 50.10 and Appendix I of Part 50, based on three complete, consecutive calendar years of quality-assured air quality monitoring data. To attain this standard, the design value, which is the 3-year average of the fourth-highest daily maximum 8-hour average ozone concentrations measured at each monitor, within the area, over each year must not exceed the ozone standard of 0.08 ppm. Based on the rounding convention described in 40

CFR part 50, Appendix I, the standard is attained if the design value is 0.084 ppm or below. The data must be collected and quality-assured in accordance with 40 CFR part 58, and recorded in the Air Quality System (AQS). The monitors generally should have remained at the same location for the duration of the monitoring period required for demonstrating attainment.

In the Lancaster Area, there is one ozone monitor, located in Lancaster County that measures air quality with respect to ozone. As part of its redesignation request, Pennsylvania referenced ozone monitoring data for the years 2003–2005 for the Lancaster Area. This data has been quality assured and is recorded in the AQS. The fourth-high 8-hour daily maximum concentrations, along with the three-year average are summarized in Table 2.

**TABLE 2.—LANCASTER AREA FOURTH HIGHEST 8-HOUR AVERAGE VALUES LANCASTER COUNTY MONITOR/AQS ID 42–071–0007**

Year	Annual 4th highest reading (ppm)
2003 .....	0.083
2004 .....	0.081
2005 .....	0.085

The average for the 3-year period 2003–2005 is 0.083 ppm.

The air quality data for 2003–2005 show that the Lancaster Area has attained the 8-hour standard with a design value of 0.083 ppm. The data collected at the Lancaster Area monitor satisfies the CAA requirement that the 3-year average of the annual fourth-highest daily maximum 8-hour average ozone concentration is less than or equal to 0.08 ppm. EPA believes this conclusion remains valid after review of the available 2006 data because the design value for 2004–2006 would be 0.083 ppm. The PADEP’s request for redesignation for the Lancaster Area indicates that the data is complete and was quality assured in accordance with 40 CFR part 58. The PADEP uses the AQS as the permanent database to maintain its data and quality assures the data transfers and content for accuracy. In addition, as discussed below with respect to the maintenance plan, PADEP has committed to continue monitoring in accordance with 40 CFR part 58. In summary, EPA has determined that the data submitted by Pennsylvania and data taken from AQS indicate that the Lancaster Area has attained the 8-hour ozone NAAQS.

*B. The Lancaster Area Has Met All Applicable Requirements Under Section 110 and Part D of the CAA and Has a Fully Approved SIP Under Section 110(k) of the CAA*

EPA has determined that the Lancaster Area has met all SIP requirements applicable for purposes of this redesignation under section 110 of the CAA (General SIP Requirements) and that it meets all applicable SIP requirements under part D of Title I of the CAA, in accordance with section 107(d)(3)(E)(v). In addition, EPA has determined that the SIP is fully approved with respect to all requirements applicable for purposes of redesignation in accordance with section 107(d)(3)(E)(ii). In making these proposed determinations, EPA ascertained which requirements are applicable to the Lancaster Area and determined that the applicable portions of the SIP meeting these requirements are fully approved under section 110(k) of the CAA. We note that SIPs must be fully approved only with respect to applicable requirements.

The September 4, 1992 Calcagni memorandum (“Procedures for Processing Requests to Redesignate Areas to Attainment,” Memorandum from John Calcagni, Director, Air Quality Management Division, September 4, 1992) describes EPA’s interpretation of section 107(d)(3)(E) with respect to the timing of applicable requirements. Under this interpretation, to qualify for redesignation, States requesting redesignation to attainment must meet only the relevant CAA requirements that came due prior to the submittal of a complete redesignation request. *See also*, Michael Shapiro memorandum, September 17, 1993, and 60 FR 12459, 12465–66 (March 7, 1995) (redesignation of Detroit-Ann Arbor). Requirements of the CAA that are applicable subsequent to the area’s submittal of a complete redesignation request remain applicable until a redesignation is approved, but are not required as a prerequisite to redesignation. Section 175A(c) of the CAA. *Sierra Club v. EPA*, 375 F.3d 537 (7th Cir. 2004). *See also*, 68 FR at 25424, 25427 (May 12, 2003) (redesignation of St. Louis).

This section also sets forth EPA’s views on the potential effect of the Court’s ruling in *South Coast* on this redesignation action. For the reasons set forth below, EPA does not believe that the Court’s ruling alters any requirements relevant to this redesignation action so as to preclude redesignation, and does not prevent EPA from finalizing this redesignation.

EPA believes that the Court's decision, as it currently stands or as it may be modified based upon any petition for rehearing that has been filed, imposes no impediment to moving forward with the redesignation of this Area to attainment, because in either circumstance, redesignation is appropriate under the relevant redesignation provisions of the Act and longstanding policies regarding redesignation requests.

#### 1. Section 110 General SIP Requirements

Section 110(a)(2) of Title I of the CAA delineates the general requirements for a SIP, which include enforceable emissions limitations and other control measures, means, or techniques, provisions for the establishment and operation of appropriate devices necessary to collect data on ambient air quality, and programs to enforce the limitations. The general SIP elements and requirements set forth in section 110(a)(2) include, but are not limited to the following:

- Submittal of a SIP that has been adopted by the State after reasonable public notice and hearing;
- Provisions for establishment and operation of appropriate procedures needed to monitor ambient air quality;
- Implementation of a source permit program; provisions for the implementation of part C requirements (Prevention of Significant Deterioration (PSD));
- Provisions for the implementation of part D requirements for New Source Review (NSR) permit programs;
- Provisions for air pollution modeling; and
- Provisions for public and local agency participation in planning and emission control rule development.

Section 110(a)(2)(D) requires that SIPs contain certain measures to prevent sources in a State from significantly contributing to air quality problems in another State. To implement this provision, EPA has required certain states to establish programs to address transport of air pollutants in accordance with the NO<sub>x</sub> SIP Call, October 27, 1998 (63 FR 57356), amendments to the NO<sub>x</sub> SIP Call, May 14, 1999 (64 FR 26298) and March 2, 2000 (65 FR 11222), and the Clean Air Interstate Rule (CAIR), May 12, 2005 (70 FR 25162). However, the section 110(a)(2)(D) requirements for a State are not linked with a particular nonattainment area's designation and classification in that State. EPA believes that the requirements linked with a particular nonattainment area's designation and classifications are the relevant measures to evaluate in

reviewing a redesignation request. The transport SIP submittal requirements, where applicable, continue to apply to a state regardless of the designation of any one particular area in the State.

Thus, we do not believe that these requirements should be construed to be applicable requirements for purposes of redesignation. In addition, EPA believes that the other section 110 elements not connected with nonattainment plan submissions and not linked with an area's attainment status are not applicable requirements for purposes of redesignation. The Lancaster Area will still be subject to these requirements after it is redesignated. The section 110 and part D requirements, which are linked with a particular area's designation and classification, are the relevant measures to evaluate in reviewing a redesignation request. This policy is consistent with EPA's existing policy on applicability of conformity (*i.e.*, for redesignations) and oxygenated fuels requirement. *See* Reading, Pennsylvania, proposed and final rulemakings (61 FR 53174, October 10, 1996), (62 FR 24826, May 7, 1997); Cleveland-Akron-Lorain, Ohio final rulemaking (61 FR 20458, May 7, 1996); and Tampa, Florida, final rulemaking (60 FR 62748, December 7, 1995). *See also*, the discussion on this issue in the Cincinnati redesignation (65 FR at 37890, June 19, 2000), and in the Pittsburgh redesignation (66 FR at 53099, October 19, 2001). Similarly, with respect to the NO<sub>x</sub> SIP Call rules, EPA noted in its Phase 1 Final Rule to Implement the 8-hour Ozone NAAQS, that the NO<sub>x</sub> SIP Call rules are not "an" 'applicable requirement' for purposes of section 110(1) because the NO<sub>x</sub> rules apply regardless of an area's attainment or nonattainment status for the 8-hour (or the 1-hour) NAAQS." 69 FR 23951, 23983 (April 30, 2004).

EPA believes that section 110 elements not linked to the area's nonattainment status are not applicable for purposes of redesignation. As explained later in this notice, two part D requirements applicable for purposes of redesignation under the 8-hour standard became due prior to the submission of the redesignation request.

#### 2. Part D Requirements Under the 8-Hour Standard

Pursuant to an April 30, 2004, final rule (69 FR 23951), the Lancaster Area was designated a marginal nonattainment area under subpart 2 for the 8-hour ozone standard. Sections 172-176 of the CAA, found in subpart 1 of part D, set forth the basic nonattainment requirements applicable to all nonattainment areas. Section 182

of the CAA, found in subpart 2 of part D, establishes additional specific requirements depending on the area's nonattainment classification.

With respect to the 8-hour standard, we do not believe that any part of the court's opinion in *South Coast* would require that this subpart 2 classification be changed upon remand to EPA. However, even assuming for present purposes that the Lancaster Area would become subject to a different classification under a classification scheme created in a future role in response to the court's decision, that would not prevent EPA from finalizing a redesignation for this area. For the reasons set forth below, we believe that any additional requirements that might apply based on that different classification would not be applicable for purposes of evaluating the redesignation request.

This belief is based upon (1) EPA's longstanding policy of evaluating redesignation requests in accordance only with the requirements due at the time the request was submitted; and (2) consideration of the inequity of applying retroactively any requirements that might be applied in the future.

First, at the time the redesignation request was submitted, the Lancaster Area was classified under subpart 2 and was required to meet the subpart 2 requirements. Under EPA's longstanding interpretation of section 107(d)(3)(E) of the Clean Air Act, to qualify for redesignation, states requesting redesignation to attainment must meet only the relevant SIP requirements that came due prior to the submittal of a complete redesignation request. September 4, 1992 Calcagni memorandum ("Procedures for Processing Requests to Redesignate Areas to Attainment," Memorandum from John Calcagni, Director, Air Quality Management Division). *See also*, Michael Shapiro Memorandum, September 17, 1993, and 60 FR 12459, 12465-66 (March 7, 1995) (redesignation of Detroit-Ann Arbor); *Sierra Club v. EPA*, 375 F.3d 537 (7th Cir. 2004) (which upheld this interpretation); 68 FR 25418, 25424, 25427 (May 12, 2003) (redesignation of St. Louis).

Moreover, it would be inequitable to retroactively apply any new SIP requirements that were not applicable at the time the request was submitted, but which might later become applicable. The D.C. Circuit has recognized the inequity in such retroactive rulemaking. *See, Sierra Club v. Whitman*, 285 F.3d 63 (D.C. Cir. 2002), in which the D.C. Circuit upheld a District Court's ruling refusing to make retroactive an EPA

determination of nonattainment that was past the statutory due date. Such a determination would have resulted in the imposition of additional requirements on the area. The Court stated: "Although EPA failed to make the nonattainment determination within the statutory time frame, Sierra Club's proposed solution only makes the situation worse. Retroactive relief would likely impose large costs on the States, which would face fines and suits for not implementing air pollution prevention plans in 1997, even though they were not on notice at the time." *Id.* at 68. Similarly, here it would be unfair to penalize the Area by applying to it for purposes of redesignation any additional requirements that were not in effect at the time it submitted its redesignation request, but that might apply in the future.

With respect to the 8-hour standard, two part D subpart 2 requirements became due for the Lancaster Area under section 182(a) of the CAA prior to redesignation—a 2002 base-year inventory, and the emissions statement requirement pursuant to section 182(a)(3)(B). Pennsylvania already has in its approved SIP an emissions statement rule for the 1-hour standard that covers all portions of the designated 8-hour nonattainment area, and that satisfies the emissions statement requirement for the 8-hour standard. *See*, 25 Pa. Code 135.21(a)(1) codified at 40 CFR 52.2020; 60 FR 2881, January 12, 1995. EPA is proposing to approve the 2002 base-year inventory for the Lancaster Area, which was submitted on September 30, 2006, and supplemented on November 8, 2006, concurrently with its maintenance plan, into the Pennsylvania SIP. A detailed evaluation of Pennsylvania's 2002 base-year inventory for the Lancaster Area can be found in a Technical Support Document (TSD) prepared by EPA for this rulemaking. EPA has determined that the emission inventory and emissions statement requirements for the Lancaster Area have been satisfied.

EPA believes it is reasonable to interpret the general conformity and NSR requirements of part D as not requiring approval prior to redesignation. With respect to section 176, Conformity Requirements, section 176(c) of the CAA requires states to establish criteria and procedures to ensure that Federally supported or funded projects conform to the air quality planning goals in the applicable SIP. The requirement to determine conformity applies to transportation plans, programs, and projects developed, funded or approved under Title 23 U.S.C. and the Federal Transit

Act ("transportation conformity") as well as to all other Federally supported or funded projects ("general conformity"). State conformity revisions must be consistent with Federal conformity regulations relating to consultation, enforcement and enforceability that the CAA required the EPA to promulgate. EPA believes it is reasonable to interpret the conformity SIP requirements as not applying for purposes of evaluating the redesignation request under section 107(d) since State conformity rules are still required after redesignation and Federal conformity rules apply where State rules have not been approved. *See, Wall v. EPA*, 265 F.3d 426, 438–440 (6th Cir. 2001), upholding this interpretation. *See also*, 60 FR 62748 (December 7, 1995).

In the case of the Lancaster Area, which is located in the Ozone Transport Region (OTR), nonattainment NSR requirements will continue to be applicable after redesignation. On October 19, 2001 (66 FR 53094), EPA approved Pennsylvania's NSR SIP revision for the Lancaster Area. This revision imposes the OTR NSR requirements in marginal and incomplete data ozone nonattainment areas and ozone attainment areas within the Commonwealth. The OTR requirements are more stringent than those required in marginal ozone nonattainment areas because a lower threshold for what constitutes a major stationary source of VOC emissions is required and a higher offset ratio is required. Pennsylvania's NSR SIP also imposes the NSR requirements on major sources of NO<sub>x</sub> emissions as required by section 182(f) of the CAA.

EPA has also interpreted the section 184 OTR requirements, including the NSR program, as not being applicable for purposes of redesignation. The rationale for this is based on two considerations. First, the requirement to submit SIP revisions for the section 184 requirements continues to apply to areas in the OTR after redesignation to attainment. Therefore, the State remains obligated to have NSR, as well as reasonably available control technology (RACT), and Vehicle Inspection and Maintenance programs even after redesignation. Second, the section 184 control measures are region-wide requirements and do not apply to Lancaster by virtue of the Area's designation and classification. *See*, 61 FR 53174, 53175–53176 (October 10, 1996) and 62 FR 24826, 24830–32 (May 7, 1997).

### 3. Part D Requirements Under the 1-Hour Standard

In its December 22, 2006 decision in *South Coast*, the Court also addressed EPA's revocation of the 1-hour ozone standard. The current status of the revocation and associated anti-backsliding rules is dependent on whether the Court's decision stands as originally issued or is modified in response to any petition for rehearing or request for clarification that has been filed. As described more fully below, EPA believes that the Area has attained the 1-hour standard and has met all of the requirements under the 1-hour standard that would apply even if the 1-hour standard is deemed to be reinstated and, those requirements are viewed as applying under the statute itself. Thus, the Court's decision, as it currently stands, imposes no impediment to moving forward with the redesignation of this Area to attainment of the 8-hour standard. Further, even if the court's decision were modified based upon any petition for rehearing that has been filed, such that the ultimate decision requires something less than compliance with all applicable 1-hour requirements, since the area meets all such requirements as explained below, it would certainly meet any lesser requirements and thus similarly redesignation could proceed.

The conformity portion of the Court's ruling does not impact the redesignation request for the Lancaster Area because there are no conformity requirements that are relevant to a redesignation request for any standard, including the requirement to submit a transportation conformity SIP.<sup>1</sup> As we have previously noted, under longstanding EPA policy, EPA believes it is reasonable to interpret the conformity SIP requirements as not applying for purposes of evaluating a redesignation request under section 107(d) because state conformity rules are still required after redesignation and federal conformity rules apply where state rules have not been approved. 40 CFR 51.390. *See, Wall v. EPA*, 265 F.3d 426 (6th Cir. 2001), upholding this interpretation. *See, also*, 60 FR 62748 (December 7, 1995) (Tampa, Florida redesignation).

With respect to the requirement for submission of contingency measures for the 1-hour standard, section 182(a) does not require contingency measures for

<sup>1</sup> The Clean Air Act section 176(c)(4)(E) currently requires States to submit revisions to their SIPs to reflect certain federal criteria and procedures for determining transportation conformity. Transportation conformity SIPs are different from the motor vehicle emissions budgets that are established in control strategy SIPs and maintenance plans.

marginal areas, and, therefore, that portion of the Court's ruling does not impact the redesignation request for the Lancaster Area.

Prior to its designation as an 8-hour ozone nonattainment area, the Lancaster Area was designated a marginal nonattainment area for the 1-hour standard. With respect to the 1-hour standard, the applicable requirements of subpart 1 and of subpart 2 of part D (section 182) for the Lancaster Area are discussed in the following paragraphs:

Section 182(a)(2)(A) required SIP revisions to correct or amend RACT for sources in marginal areas, such as the Lancaster Area, that were subject to control technique guidelines (CTGs) issued before November 15, 1990 pursuant to CAA section 108. On December 22, 1994, EPA fully approved into the Pennsylvania SIP all corrections required under section 182(a)(2)(A) of the CAA (59 FR 65971, December 22, 1994). EPA believes that this requirement applies only to marginal and higher classified areas under the 1-hour NAAQS pursuant to the 1990 amendments to the CAA; therefore, this is a one-time requirement. After an area has fulfilled the section 182(a)(2)(A) requirement for the 1-hour NAAQS, there is no requirement under the 8-hour NAAQS.

Section 182(a)(2)(B) relates to the savings clause for vehicle inspection and maintenance (I/M). It requires marginal areas to adopt vehicle I/M programs. This provision was not applicable to the Lancaster Area because this area did not have and was not required to have an I/M program before November 15, 1990.

Section 182(a)(3)(A) requires a triennial Periodic Emissions Inventory for the nonattainment area. The most recent inventory for the Lancaster Area was compiled for 2002 and submitted to EPA as a SIP revision with the maintenance plan for the Lancaster Area.

Section 182(a)(2)(C) required Pennsylvania to adopt a NSR Permit Program or to correct its existing program to meet EPA guidance requirements issued prior to 1990. As discussed previously, EPA believes it is reasonable to interpret the NSR requirements of part D as not requiring approval prior to redesignation. However, as noted previously, EPA has fully approved Pennsylvania's NSR program for the Lancaster Area.

Section 182(a)(3)(B) requires sources of VOCs and NO<sub>x</sub> in the nonattainment area to submit Emissions Statements regarding the quantity of emissions from the previous year. As discussed previously, Pennsylvania already has in

its approved SIP a previously approved emissions statement rule for the 1-hour standard which applies to the Lancaster Area.

Section 182(a)(1) provides for the submission of a comprehensive, accurate, current inventory of actual emissions from all sources, as described in section 172(c)(3), in accordance with guidance provided by the Administrator. In this proposed rule, EPA is proposing to approve a 2002 base-year emissions inventory for the Lancaster Area as meeting the requirement of section 182(a)(1). While EPA generally required that the base-year inventory for the 1-hour standard be for calendar year 1990, EPA believes that Pennsylvania's 2002 inventory fulfills this requirement because it meets EPA's guidance and because it is more up to date than 1990. EPA also proposes to determine that, if the 1-hour standard is deemed to be reinstated, the 2002 base-year inventory for the 8-hour standard will provide an acceptable substitute for the base-year inventory for the 1-hour standard.

As noted previously, EPA believes it is reasonable to interpret the general conformity requirements of part D as not requiring approval prior to redesignation.

EPA has previously determined that the Lancaster Area has attained the 1-hour ozone NAAQS by the November 15, 1993 attainment date (60 FR 3349, January 17, 1995), and we further believe that the Lancaster Area is still in attainment for the 1-hour ozone NAAQS based upon the ozone monitoring data for the years 2003–2005. To demonstrate attainment, *i.e.*, compliance with this standard, the annual average of the number of expected exceedances of the 1-hour standard over a three-year period must be less than or equal to 1. Table 3 provides a summary of the number of expected exceedances for each of the years 2003 through 2005 and three-year annual average.

TABLE 3.—LANCASTER NONATTAINMENT AREA NUMBER OF EXPECTED EXCEEDANCES OF THE 1-HOUR OZONE STANDARD; LANCASTER COUNTY MONITOR/AQS ID 42–071–0007

Year	Number of expected exceedances
2003 .....	1.0
2004 .....	0.0
2005 .....	0.0

The average number of expected exceedances for the 3-year period 2003 through 2005 is 0.3.

In summary, EPA has determined that the data submitted by Pennsylvania and taken from AQS indicates that the Lancaster Area is maintaining air quality that conforms to the 1-hour ozone NAAQS. EPA believes this conclusion remains valid after review of the available 2006 data because no exceedances were recorded in the Lancaster Area in 2006.

4. Transport Region Requirements

All areas in the Ozone Transport Region (OTR), both attainment and nonattainment, are subject to additional control requirements under section 184 for the purpose of reducing interstate transport of emissions that may contribute to downwind ozone nonattainment. The section 184 requirements include RACT, enhanced vehicle inspection and maintenance, and Stage II vapor recovery or a comparable measure.

In the case of the Lancaster Area, which is located in the OTR, nonattainment NSR will be applicable after redesignation. On October 19, 2001 (66 FR 53094), EPA fully approved Pennsylvania's NSR SIP revision consisting of Pennsylvania's Chapter 127 part D NSR regulations that cover the Lancaster Area. The Chapter 127 part D NSR regulations in the Pennsylvania SIP explicitly apply the requirements for NSR of section 184 of the CAA to attainment areas within the OTR.

EPA has also interpreted the section 184 OTR requirements, including the NSR program, as not being applicable for purposes of redesignation. *See*, 61 FR 53174, October 10, 1996 and 62 FR 24826, May 7, 1997 (Reading, Pennsylvania Redesignation). The rationale for this is based on two considerations. First, the requirement to submit SIP revisions for the section 184 requirements continues to apply to areas in the OTR after redesignation to attainment. Therefore, the State remains obligated to have NSR, as well as RACT, and I/M even after redesignation. Second, the section 184 control measures are region-wide requirements and do not apply to the Area by virtue of the Area's designation and classification. *See*, 61 FR 53174 at 53175–53176 (October 10, 1996) and 62 FR 24826 at 24830–24832 (May 7, 1997).

5. Lancaster Has a Fully Approved SIP for Purposes of Redesignation

EPA has fully approved the Pennsylvania SIP for the purposes of this redesignation. EPA may rely on prior SIP approvals in approving a redesignation request, Calcagni Memo, p.3; *Southwestern Pennsylvania Growth*

*Alliance v. Browner*, 144 F. 3d 984, 989–90 (6th Cir. 1998), *Wall v. EPA*, 265 F. 3d 426 (6th Cir. 2001), plus any additional measures it may approve in conjunction with a redesignation action. See, 68 FR at 25425 (May 12, 2003) and citations therein.

The Lancaster Area was a 1-hour ozone marginal nonattainment area at the time of its designation as a marginal 8-hour ozone nonattainment area on September 22, 2004 (69 FR 56697). As stated previously, two subpart 2 part D requirements became due for the Lancaster Area prior to redesignation—a 2002 base-year inventory, and the emissions statement requirement.

PADEP has submitted concurrently with its maintenance plan, a 2002 base-year inventory as a SIP revision. In this action, EPA is proposing approval of this inventory. The emissions statement requirement for Lancaster was fulfilled under the 1-hour standard. Because there are no outstanding SIP submission requirements applicable for the purposes of the redesignation of Lancaster, the applicable implementation plan satisfies all pertinent SIP requirements.

*C. The Air Quality Improvement in the Lancaster Area Is Due to Permanent and Enforceable Reductions in Emissions Resulting From Implementation of the SIP and Applicable Federal Air Pollution Control Regulations and Other Permanent and Enforceable Reductions*

EPA believes that the Commonwealth has demonstrated that the observed air quality improvement in the Lancaster Area is due to permanent and enforceable reductions in emissions resulting from implementation of the SIP, Federal measures, and other State-adopted measures. Emissions reductions attributable to these rules are shown in Table 4.

TABLE 4.—TOTAL VOC AND NO<sub>x</sub> EMISSIONS FOR 2002 AND 2004 IN TONS PER DAY (TPD)

Year	Point*	Area	Nonroad	Mobile	Total
<b>Volatile Organic Compounds (VOC)</b>					
2002 .....	8.5	24.5	17.4	23.4	73.8
2004 .....	8.1	24.4	17.3	19.8	69.6
Diff. (02–04) .....	0.4	0.1	0.1	3.6	4.2
<b>Nitrogen Oxides (NO<sub>x</sub>)</b>					
2002 .....	3.6	2.6	13.7	36.9	56.8
2004 .....	3.9	2.6	13.2	32.3	52.0
Diff (02–04) .....	–03	0.0	0.5	4.6	4.8

\* The stationary point source emissions shown here do not include banked emission credits of 3.7 tpd of VOC and 11 tpd of NO<sub>x</sub> as indicated in Technical Appendix A–4 to Pennsylvania’s SIP submission.

Between 2002 and 2004, VOC emissions decreased by 5.7 percent from 73.8 tpd to 69.6 tpd; NO<sub>x</sub> emissions decreased by 8.4 percent from 56.8 tpd to 52.0 tpd. These reductions, and anticipated future reductions, are due to the following permanent and enforceable measures.

1. Stationary Point Sources

Interstate Pollution Transport Reduction (66 FR 43795, August 21, 2001)

2. Stationary Area Sources

Solvent Cleaning (68 FR 2206, January 16, 2003)

Portable Fuel Containers (69 FR 70893, December 8, 2004)

3. Highway Vehicle Sources

Federal Motor Vehicle Control Programs (FMVCP)

—Tier 1 (56 FR 25724, June 5, 1991)

—Tier 2 (65 FR 6698, February 10, 2000)

Heavy-duty Engine and Vehicle Standards (62 FR 54694, October 21, 1997, and 65 FR 59896, October 6, 2000)

National Low Emission Vehicle (NLEV) Program (64 FR 72564, December 28, 1999) Vehicle Emission Inspection/Maintenance Program (70 FR 58313, October 6, 2005)

4. Non-Road Sources

Nonroad Diesel Engine and Fuel (69 FR 38958, June 29, 2004)

EPA believes that permanent and enforceable emissions reductions are the cause of the long-term improvement in ozone levels and are the cause of the area achieving attainment of the 8-hour ozone standard.

*D. The Lancaster Area Has a Fully Approvable Maintenance Plan Pursuant to Section 175A of the CAA*

In conjunction with its request to redesignate the Lancaster Area to attainment status, Pennsylvania submitted a SIP revision to provide for maintenance of the 8-hour ozone NAAQS in the Lancaster Area for at least 11 years after redesignation. Pennsylvania is requesting that EPA approve this SIP revision as meeting the requirement of section 175A of the CAA. Once approved, the maintenance plan for the 8-hour ozone NAAQS will ensure that the SIP for the Lancaster Area meets the requirements of the CAA regarding maintenance of the applicable 8-hour ozone standard.

What Is Required in a Maintenance Plan?

Section 175 of the CAA sets forth the elements of a maintenance plan for areas seeking redesignation from nonattainment to attainment. Under section 175A, the plan must demonstrate continued attainment of the applicable NAAQS for at least 10 years after approval of a redesignation of an area to attainment. Eight years after the redesignation, the State must submit a revised maintenance plan demonstrating that attainment will continue to be maintained for the next 10-year period following the initial 10-year period. To address the possibility of future NAAQS violations, the maintenance plan must contain such contingency measures, with a schedule for implementation, as EPA deems necessary to assure prompt correction of any future 8-hour ozone violations. Section 175A of the CAA sets forth the elements of a maintenance plan for areas seeking redesignation from nonattainment to attainment. The Calcagni memo provides additional guidance on the content of a maintenance plan. An ozone maintenance plan should address the following provisions:

- (a) An attainment emissions inventory;
- (b) A maintenance demonstration;
- (c) A monitoring network;
- (d) Verification of continued attainment; and
- (e) A contingency plan.

Analysis of the Lancaster Area Maintenance Plan

(a) Attainment inventory—An attainment inventory includes the emissions during the time period associated with the monitoring data showing attainment. An attainment year of 2004 was used for the Lancaster Area since it is a reasonable year within the 3-year block of 2003–2005 and accounts for reductions attributable to implementation of the CAA requirements to date.

The 2002 and 2004 point source data was compiled from actual sources. Pennsylvania requires owners and operators of larger facilities to submit annual production figures and emission calculations each year. Throughput data are multiplied by emission factors from Factor Information Retrieval (FIRE) Data Systems and EPA’s publication series AP-42, and are based on Source Classification Codes (SCC). The 2002 area source data was compiled using county-level activity data, from census numbers, from county numbers, etc. The

2004 area source data was projected from the 2002 inventory using temporal allocations provided by the Mid-Atlantic Regional Air Management Association (MARAMA).

The on-road mobile source inventories for 2002 and 2004 were compiled using MOBILE6.2 and PENNDOT estimates for VMT. The PADEP has provided detailed data summaries to document the calculations of mobile on-road VOC and NO<sub>x</sub> emissions for 2002, as well as for the projection years of 2004, 2009, and 2018 (shown in Tables 4 and 5 below). The 2002 and 2004 emissions for the majority of non-road emission source categories were estimated using the EPA NONROAD 2005 model. The NONROAD model calculates emissions for diesel, gasoline, liquefied petroleum gasoline, and compressed natural gas-fueled non-road equipment types and includes growth factors. The NONROAD model does not estimate emissions from locomotives or aircraft. For 2002 and 2004 locomotive emissions, the PADEP projected emissions from a 1999 survey using national fuel consumption information and EPA emission and conversion factors. There are no commercial aircraft operations in Lancaster County. For 2002 and 2004 aircraft emissions, PADEP estimated emissions using small airport operations

statistics and emission factors and operational characteristics in the EPA-approved model, Emissions and Dispersion Modeling System (EDMS).

More detailed information on the compilation of the 2002, 2004, 2009, and 2018 inventories can be found in the Technical Appendices which are part of this submittal.

(b) Maintenance Demonstration—On September 20, 2006, and supplemented on November 8, 2006, the PADEP submitted a maintenance plan as a SIP revision as required by section 175A of the CAA. The Lancaster Area plan shows maintenance of the 8-hour ozone NAAQS by demonstrating that current and future emissions of VOC and NO<sub>x</sub> remain at or below the attainment year 2004 emissions levels throughout the Lancaster Area through the year 2018. A maintenance demonstration need not be based on modeling. *See, Wall v. EPA, supra; Sierra Club v. EPA, supra. See also, 66 FR at 53099–53100; 68 FR at 25430–25432.*

Tables 5 and 6 specify the VOC and NO<sub>x</sub> emissions for the Lancaster Area for 2004, 2009, and 2018. The PADEP chose 2009 as an interim year in the maintenance demonstration period to demonstrate that the VOC and NO<sub>x</sub> emissions are not projected to increase above the 2004 attainment level during the time of the maintenance period.

TABLE 5.—TOTAL VOC EMISSIONS FOR 2004–2018 (TPD)

Source category	2004 VOC emissions	2009 VOC emissions	2018 VOC emissions
Point* .....	8.1	8.7	11.0
Area .....	24.4	24.2	27.2
Mobile .....	19.8	14.3	7.8
Nonroad .....	17.3	15.0	11.9
<b>Total .....</b>	<b>69.6</b>	<b>62.2</b>	<b>57.9</b>

\* The stationary point source emissions shown here do not include available banked emission credits as indicated in Appendix A–4 submitted with the maintenance plan.

TABLE 6.—TOTAL NO<sub>x</sub> EMISSIONS FOR 2004–2018 (TPD)

Source category	2004 NO <sub>x</sub> emissions	2009 NO <sub>x</sub> emissions	2018 NO <sub>x</sub> emissions
Point* .....	3.9	4.1	4.6
Area .....	2.6	2.8	2.9
Mobile .....	32.3	22.3	9.0
Non-road .....	13.2	10.8	6.8
<b>Total .....</b>	<b>52.0</b>	<b>39.9</b>	<b>23.2</b>

\* The stationary point source emissions shown here do not include available banked emission credits as indicated in Appendix A–4.

The following programs are permanent and enforceable control measures to ensure emissions during the maintenance period are equal to or less than the emissions in the attainment year:

- The Clean Air Interstate Rule (CAIR) (71 FR 25328, April 28, 2006)
- The Federal NO<sub>x</sub> SIP Call (66 FR 43795, August 21, 2001)
- Pennsylvania’s Portable Fuel Containers (December 8, 2004, 69 FR 70893)
- Pennsylvania’s Consumer Products (December 8, 2004, 69 FR 70895)

• Pennsylvania's Architectural and Industrial Maintenance (AIM) Coatings (November 23, 2004, 69 FR 68080)

Additionally, the following mobile programs are either effective or due to become effective and will further contribute to the maintenance demonstration of the 8-hour ozone NAAQS:

- FMVCP for passenger vehicles and light-duty trucks and cleaner gasoline (2009 and 2018 fleet)—Tier 1 (56 FR 25724, June 5, 1991) and Tier 2 (65 FR 6698, February 10, 2000)
- Federal NLEV (64 FR 72564, December 28, 1999)
- PA Clean Vehicle Program (December 9, 2006)—Pennsylvania will implement this program in car model year 2008.
- Heavy-duty diesel on-road (2004/2007) and low-sulfur on-road (2006) (66 FR 5002, January 18, 2001)
- Non-road emissions standards (2008) and off-road diesel fuel (2007/2010) (69 FR 38958, June 29, 2004)
- Vehicle emission/inspection/maintenance program (70 FR 58313, October 6, 2005)
- Pennsylvania Heavy-Duty Diesel Emissions Control Program. (May 11, 2002)

Based upon the comparison of the projected emissions and the attainment year emissions along with the additional measures, EPA concludes that PADEP has successfully demonstrated that the 8-hour ozone standard should be maintained in the Lancaster Areas.

(c) Monitoring Network—There is currently one monitor measuring ozone in the Lancaster Area. PADEP will continue to operate its current air quality monitor (located in Lancaster County), in accordance with 40 CFR part 58.

(d) Verification of Continued Attainment—The Commonwealth will track the attainment status of the ozone NAAQS in the Lancaster Area by reviewing air quality and emissions during the maintenance period. The Commonwealth will perform an annual evaluation of Vehicle Miles Traveled (VMT) data and emissions reported from stationary sources, and compare them to the assumptions about these factors used in the maintenance plan. The Commonwealth will also evaluate the periodic (every three years) emission inventories prepared under EPA's Consolidated Emission Reporting Regulation (40 CFR 51, subpart A) to see if the Area exceeds the attainment year inventory (2004) by more than 10 percent. Based on these evaluations, the Commonwealth will consider whether any further emission control measures should be implemented.

(e) The Maintenance Plan's Contingency Measures—The contingency plan provisions are designed to promptly correct a violation of the NAAQS that occurs after redesignation. Section 175A of the CAA requires that a maintenance plan include such contingency measures as EPA deems necessary to ensure that the State will promptly correct a violation of the NAAQS that occurs after redesignation. The maintenance plan should identify the events that would "trigger" the adoption and implementation of a contingency measure(s), the contingency measure(s) that would be adopted and implemented, and the schedule indicating the time frame by which the state would adopt and implement the measure(s).

The ability of the Lancaster Area to stay in compliance with the 8-hour ozone standard after redesignation depends upon VOC and NO<sub>x</sub> emissions in the Area remaining at or below 2004 levels. The Commonwealth's maintenance plan projects VOC and NO<sub>x</sub> emissions to decrease and stay below 2004 levels through the year 2018. The Commonwealth's maintenance plan outlines the procedures for the adoption and implementation of contingency measures to further reduce emissions should a violation occur.

Contingency measures will be considered if for two consecutive years the fourth highest 8-hour ozone concentrations at the Lancaster monitor are above 84 ppb. If this trigger point occurs, the Commonwealth will evaluate whether additional local emission control measures should be implemented in order to prevent a violation of the air quality standard. PADEP will also analyze the conditions leading to the excessive ozone levels and evaluate which measures might be most effective in correcting the excessive ozone levels. PADEP will also analyze the potential emissions effect of Federal, state, and local measures that have been adopted but not yet implemented at the time the excessive ozone levels occurred. PADEP will then begin the process of implementing any selected measures.

Contingency measures will be considered in the event that a violation of the 8-hour ozone standard occurs at the Lancaster County, Pennsylvania monitor. In the event of a violation of the 8-hour ozone standard, contingency measures will be adopted in order to return the Area to attainment with the standard. Contingency measures to be considered for the Lancaster Area will

include, but not be limited to the following:

- Regulatory measures:*
- Additional controls on consumer products.
  - Additional controls on portable fuel containers
- Non-Regulatory measures:*
- Voluntary diesel engine "chip reflash"—installation software to correct the defeat device option on certain heavy-duty diesel engines.
  - Diesel retrofit, including replacement, repowering or alternative fuel use, for public or private local on-road or off-road fleets.
  - Idling reduction technology for Class 2 yard locomotives.
  - Idling reduction technologies or strategies for truck stops, warehouses and other freight-handling facilities.
  - Accelerated turnover of lawn and garden equipment, especially commercial equipment, including promotion of electric equipment.
  - Additional promotion of alternative fuel (e.g., biodiesel) for home heating and agricultural use.

The plan lays out a process to have any regulatory contingency measures in effect within 19 months of the trigger. The plan also lays out a process to implement the non-regulatory contingency measures within 12–24 months of the trigger.

## VII. Are the Motor Vehicle Emissions Budgets Established and Identified in the Lancaster Maintenance Plan Adequate and Approvable?

### A. What Are the Motor Vehicle Emissions Budgets?

Under the CAA, States are required to submit, at various times, control strategy SIPs and maintenance plans in ozone areas. These control strategy SIPs (i.e., RFP SIPs and attainment demonstration SIPs) and maintenance plans identify and establish MVEBs for certain criteria pollutants and/or their precursors to address pollution from on-road mobile sources. In the maintenance plan, the MVEBs are termed "on-road mobile source emission budgets." Pursuant to 40 CFR part 93 and § 51.112, MVEBs must be established in an ozone maintenance plan. A MVEB is the portion of the total allowable emissions that is allocated to highway and transit vehicle use and emissions. A MVEB serves as a ceiling on emissions from an area's planned transportation system. The MVEB concept is further explained in the preamble to the November 24, 1993, transportation conformity rule (58 FR 62188). The preamble also describes how to establish and revise the MVEBs

in control strategy SIPs and maintenance plans.

Under section 176(c) of the CAA, new transportation projects, such as the construction of new highways, must “conform” to (i.e., be consistent with) the part of the State’s air quality plan that addresses pollution from cars and trucks. “Conformity” to the SIP means that transportation activities will not cause new air quality violations, worsen existing violations, or delay timely attainment of or reasonable progress towards the NAAQS. If a transportation plan does not “conform,” most new projects that would expand the capacity of roadways cannot go forward. Regulations at 40 CFR part 93 set forth EPA policy, criteria, and procedures for demonstrating and ensuring conformity of such transportation activities to a SIP.

When reviewing submitted “control strategy” SIPs or maintenance plans containing MVEBs, EPA must affirmatively find the MVEB contained therein “adequate” for use in determining transportation conformity. After EPA affirmatively finds the submitted MVEB is adequate for transportation conformity purposes, that MVEB can be used by state and federal agencies in determining whether proposed transportation projects “conform” to the SIP as required by section 176(c) of the CAA. EPA’s substantive criteria for determining “adequacy” of a MVEB are set out in 40 CFR 93.118(e)(4).

EPA’s process for determining “adequacy” consists of three basic steps: public notification of a SIP submission, a public comment period, and EPA’s adequacy finding. This process for determining the adequacy of submitted SIP MVEBs was initially outlined in EPA’s May 14, 1999 guidance, “Conformity Guidance on Implementation of March 2, 1999, Conformity Court Decision.” This guidance was finalized in the Transportation Conformity Rule Amendments for the “New 8-Hour Ozone and PM<sub>2.5</sub> National Ambient Air Quality Standards and Miscellaneous Revisions for Existing Areas; Transportation Conformity Rule Amendments—Response to Court Decision and Additional Rule Change” on July 1, 2004 (69 FR 40004). EPA consults this guidance and follows this rulemaking in making its adequacy determinations.

The MVEB for the Lancaster Area are listed in Table 1 of this document for the 2009 and 2018 years, and are the projected emissions for the on-road mobile sources plus any portion of the safety margin allocated to the MVEBs. These emission budgets, when approved

by EPA, must be used for transportation conformity determinations.

#### *B. What Is a Safety Margin?*

A safety margin is the difference between the attainment level of emissions (from all sources) and the projected level of emissions (from all sources) in the maintenance plan. The attainment level of emissions is the level of emissions during one of the years in which the area met the NAAQS. The safety margin is the extra emissions that can be allocated as long as the total attainment level of emissions is maintained. The credit, or a portion thereof, can be allocated to any of the source categories. PADEP is at this time preserving the entire difference between attainment and projected maintenance year emissions to ensure continued maintenance of the standard.

#### *C. Why Are the MVEBs Approvable?*

The 2009 and 2018 MVEBs for the Lancaster Area are approvable because the MVEBs for NO<sub>x</sub> and VOCs continue to maintain the total emissions at or below the attainment year inventory levels as required by the transportation conformity regulations.

#### *D. What Is the Adequacy and Approval Process for the MVEBs in the Lancaster Maintenance Plan?*

The MVEBs for the Lancaster Area maintenance plan are being posted to EPA’s conformity Web site concurrently with this proposal. The public comment period will end at the same time as the public comment period for this proposed rule. In this case, EPA is concurrently processing the action on the maintenance plan and the adequacy process for the MVEBs contained therein. In this proposed rule, EPA is proposing to find the MVEBs adequate and also proposing to approve the MVEBs as part of the maintenance plan. The MVEBs cannot be used for transportation conformity until the maintenance plan and associated MVEBs are approved in a final **Federal Register** notice, or EPA otherwise finds the budgets adequate in a separate action following the comment period.

If EPA receives adverse written comments with respect to the proposed approval of the Lancaster MVEBs, or any other aspect of our proposed approval of this updated maintenance plan, we will respond to the comments on the MVEBs in our final action or proceed with the adequacy process as a separate action. Our action on the Lancaster Area MVEBs will also be announced on EPA’s conformity Web site: <http://www.epa.gov/otaq/stateresources/transconf/index.htm>

(once there, click on “Adequacy Review of SIP Submissions”).

### **VIII. Proposed Actions**

EPA is proposing to determine that the Lancaster Area has attained the 8-hour ozone NAAQS. EPA is also proposing to approve the redesignation of the Lancaster Area from nonattainment to attainment for the 8-hour ozone NAAQS. EPA has evaluated Pennsylvania’s redesignation request and determined that it meets the redesignation criteria set forth in section 107(d)(3)(E) of the CAA. EPA believes that the redesignation request and monitoring data demonstrate that the Lancaster Area has attained the 8-hour ozone standard. The final approval of this redesignation request would change the designation of the Lancaster Area from nonattainment to attainment for the 8-hour ozone standard. EPA is also proposing to approve the associated maintenance plan for the Lancaster Area, submitted on September 20, 2006, and supplemented on November 8, 2006, as a revision to the Pennsylvania SIP. EPA is proposing to approve the maintenance plan for the Lancaster Area because it meets the requirements of section 175A as described previously in this notice. EPA is also proposing to approve the 2002 base-year inventory for the Lancaster Area, and the MVEBs submitted by Pennsylvania for the Lancaster Area in conjunction with its redesignation request. EPA is soliciting public comments on the issues discussed in this document. These comments will be considered before taking final action.

### **IX. Statutory and Executive Order Reviews**

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this proposed action is not a “significant regulatory action” and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, “Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use” (66 Fed. Reg. 28355 (May 22, 2001)). This action merely proposes to approve state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this proposed rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule proposes to approve pre-existing requirements under state law and does not impose any additional enforceable

duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104-4). This proposed rule also does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it merely proposes to approve a state rule implementing a Federal requirement, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This proposed rule also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it approves a State rule implementing a Federal standard. In reviewing SIP submissions, EPA's role is to approve State choices, provided that they meet the criteria of the Clean Air Act. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the Clean Air Act. Redesignation is an action that affects the status of a geographical area and does not impose any new requirements on sources. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. As required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996), in issuing this proposed rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct. EPA has complied with Executive Order 12630 (53 FR 8859, March 15, 1988) by examining the takings implications of the rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated

Takings" issued under the executive order.

This rule, proposing to approve the redesignation of the Lancaster Area to attainment for the 8-hour ozone NAAQS, the associated maintenance plan, the 2002 base-year inventory, and the MVEB identified in the maintenance plan, does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

#### List of Subjects

##### 40 CFR Part 52

Environmental protection, Air pollution control, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

##### 40 CFR Part 81

Air pollution control, National parks, Wilderness areas.

[Docket No. 061219338-6338-01; I.D. 120806A]

RIN 0648-AU69

### Fisheries off West Coast States and in the Western Pacific; Amendment 15

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Proposed rule; request for comments.

**SUMMARY:** The Secretary of Commerce (Secretary) requests public comments on a proposed rule to implement Amendment 15 to the Pacific Coast Salmon Fisheries Management Plan (Plan) in accordance with the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). This Amendment was approved by NMFS on March 22, 2007, and in accordance with the notification procedures of the Magnuson-Stevens Act the Pacific Fishery Management Council (PFMC) was notified of this approval. This

action is intended to provide management flexibility in times of low Klamath River fall-run Chinook (KRFC) abundance, while preserving the long-term productive capacity of the stock and thereby ensuring it continues to contribute meaningfully to ocean and river fisheries in the future.

**DATES:** A notice of availability (NOA) of Amendment 15 was published on December 20, 2006 under the RIN 0648-AV07. Written comments on the amendment's NOA were due February 20, 2007. Written comments on this proposed rule must be received by June 28, 2007.

**ADDRESSES:** You may submit comments, identified by "I.D. 120806A" by any of the following methods:

- Email:

[salmon2006amend15@noaa.gov](mailto:salmon2006amend15@noaa.gov)

- Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the instructions for submitting comments, and include "I.D. 120806A" in the subject line of the message.

- Mail: D. Robert Lohn, Administrator, Northwest Region, NMFS, Sand Point Way NE, BIN C15700, Seattle, WA 98115-0070; or to Rodney R. McInnis, Administrator, Southwest Region, NMFS, 501 West Ocean Boulevard, Suite 4200, Long Beach, CA 90802-4213.

#### SUPPLEMENTARY INFORMATION:

##### Background

The Pacific Coast Salmon Fishery Management Plan (FMP) was developed by the Pacific Fishery Management Council (PFMC or Council) under the Magnuson-Stevens Act, 16 U.S.C. 1801 *et seq.*, and approved by the Secretary in 1978. Since then, the FMP has been amended 14 times, with implementing regulations codified at 50 CFR part 660, subpart H. From 1979 to 1983, the FMP was amended annually. In 1984, a framework amendment was implemented that provided the mechanism for making preseason and inseason adjustments in the regulations without annual amendments.

Amendment 9 to the FMP was approved in 1988 and implemented in ocean fishing regulations effective May 1, 1989. This Salmon FMP amendment codified the harvest rate management
