

“(2) the duties and responsibilities of the Administrator under that Act; or

“(3) the regulation or control of point or nonpoint sources of pollution discharged into waters covered by that Act.

The Administrator shall identify in the agency’s annual budget all funding and full-time equivalents administering such title XIV separately from funding and staffing for the Federal Water Pollution Control Act.”

CONGRESSIONAL FINDINGS

Pub. L. 104-182, §3, Aug. 6, 1996, 110 Stat. 1614, provided that: “The Congress finds that—

“(1) safe drinking water is essential to the protection of public health;

“(2) because the requirements of the Safe Drinking Water Act (42 U.S.C. 300f et seq.) now exceed the financial and technical capacity of some public water systems, especially many small public water systems, the Federal Government needs to provide assistance to communities to help the communities meet Federal drinking water requirements;

“(3) the Federal Government commits to maintaining and improving its partnership with the States in the administration and implementation of the Safe Drinking Water Act;

“(4) States play a central role in the implementation of safe drinking water programs, and States need increased financial resources and appropriate flexibility to ensure the prompt and effective development and implementation of drinking water programs;

“(5) the existing process for the assessment and selection of additional drinking water contaminants needs to be revised and improved to ensure that there is a sound scientific basis for setting priorities in establishing drinking water regulations;

“(6) procedures for assessing the health effects of contaminants establishing drinking water standards should be revised to provide greater opportunity for public education and participation;

“(7) in considering the appropriate level of regulation for contaminants in drinking water, risk assessment, based on sound and objective science, and benefit-cost analysis are important analytical tools for improving the efficiency and effectiveness of drinking water regulations to protect human health;

“(8) more effective protection of public health requires—

“(A) a Federal commitment to set priorities that will allow scarce Federal, State, and local resources to be targeted toward the drinking water problems of greatest public health concern;

“(B) maximizing the value of the different and complementary strengths and responsibilities of the Federal and State governments in those States that have primary enforcement responsibility for the Safe Drinking Water Act; and

“(C) prevention of drinking water contamination through well-trained system operators, water systems with adequate managerial, technical, and financial capacity, and enhanced protection of source waters of public water systems;

“(9) compliance with the requirements of the Safe Drinking Water Act continues to be a concern at public water systems experiencing technical and financial limitations, and Federal, State, and local governments need more resources and more effective authority to attain the objectives of the Safe Drinking Water Act; and

“(10) consumers served by public water systems should be provided with information on the source of the water they are drinking and its quality and safety, as well as prompt notification of any violation of drinking water regulations.”

GAO STUDY

Pub. L. 104-182, title I, §101(b)(2), Aug. 6, 1996, 110 Stat. 1617, required the Comptroller General to study

the reliance for residential water on various nonpublic water systems and to submit a report on the results of the study to Congress within 3 years after Aug. 6, 1996.

SAFE DRINKING WATER AMENDMENTS OF 1977 RESTRICTIONS ON APPROPRIATIONS FOR RESEARCH

Pub. L. 95-190, §2(e), Nov. 16, 1977, 91 Stat. 1393, provided that: “Nothing in this Act [see Short Title of 1977 Amendment note set out under section 201 of this title] shall be construed to authorize the appropriation of any amount for research under title XIV of the Public Health Service Act [42 U.S.C. 300f et seq.] (relating to safe drinking water).”

SAFE DRINKING WATER AMENDMENTS OF 1977 AS NOT AFFECTING AUTHORITY OF ADMINISTRATOR WITH RESPECT TO CONTAMINANTS

Pub. L. 95-190, §3(e)(2), Nov. 16, 1977, 91 Stat. 1394, provided that: “Nothing in this Act [see Short Title of 1977 Amendment note set out under section 201 of this title] shall be construed to alter or affect the Administrator’s authority or duty under title 14 of the Public Health Service Act [42 U.S.C. 300f et seq.] to promulgate regulations or take other action with respect to any contaminant.”

RURAL WATER SURVEY; REPORT TO PRESIDENT AND CONGRESS; AUTHORIZATION OF APPROPRIATIONS

Pub. L. 93-523, §3, Dec. 16, 1974, 88 Stat. 1693, as amended by Pub. L. 95-190, §§2(d), 3(d), Nov. 16, 1977, 91 Stat. 1393, 1394, directed Administrator of Environmental Protection Agency, after consultation with Secretary of Agriculture and the several States, to enter into arrangements with public or private entities to conduct a survey of quantity, quality, and availability of rural drinking water supplies, which survey was to include, but not be limited to, consideration of number of residents in each rural area who presently are being inadequately served by a public or private drinking water supply system, or by an individual home drinking water supply system, or who presently have limited or otherwise inadequate access to drinking water, or who, due to absence or inadequacy of a drinking water supply system, are exposed to an increased health hazard, and who have experienced incidents of chronic or acute illness, which may be attributed to inadequacy of a drinking water supply system. Survey to be completed within eighteen months of Dec. 16, 1974, and a final report thereon submitted, not later than six months after completion of survey, to President and to Congress.

Executive Documents

TERMINATION OF TRUST TERRITORY OF THE PACIFIC ISLANDS

For termination of Trust Territory of the Pacific Islands, see note set out preceding section 1681 of Title 48, Territories and Insular Possessions.

FEDERAL COMPLIANCE WITH POLLUTION CONTROL STANDARDS

For provisions relating to the responsibility of the head of each Executive agency for compliance with applicable pollution control standards, see Ex. Ord. No. 12088, Oct. 13, 1978, 43 F.R. 47707, set out as a note under section 4321 of this title.

PART B—PUBLIC WATER SYSTEMS

§ 300g. Coverage

Subject to sections 300g-4 and 300g-5 of this title, national primary drinking water regulations under this part shall apply to each public water system in each State; except that such regulations shall not apply to a public water system—

(1) which consists only of distribution and storage facilities (and does not have any collection and treatment facilities);

(2) which obtains all of its water from, but is not owned or operated by, a public water system to which such regulations apply;

(3) which does not sell water to any person; and

(4) which is not a carrier which conveys passengers in interstate commerce.

(July 1, 1944, ch. 373, title XIV, §1411, as added Pub. L. 93-523, §2(a), Dec. 16, 1974, 88 Stat. 1662.)

§ 300g-1. National drinking water regulations

(a) National primary drinking water regulations; maximum contaminant level goals; simultaneous publication of regulations and goals

(1) Effective on June 19, 1986, each national interim or revised primary drinking water regulation promulgated under this section before June 19, 1986, shall be deemed to be a national primary drinking water regulation under subsection (b). No such regulation shall be required to comply with the standards set forth in subsection (b)(4) unless such regulation is amended to establish a different maximum contaminant level after June 19, 1986.

(2) After June 19, 1986, each recommended maximum contaminant level published before June 19, 1986, shall be treated as a maximum contaminant level goal.

(3) Whenever a national primary drinking water regulation is proposed under subsection (b) for any contaminant, the maximum contaminant level goal for such contaminant shall be proposed simultaneously. Whenever a national primary drinking water regulation is promulgated under subsection (b) for any contaminant, the maximum contaminant level goal for such contaminant shall be published simultaneously.

(4) Paragraph (3) shall not apply to any recommended maximum contaminant level published before June 19, 1986.

(b) Standards

(1) IDENTIFICATION OF CONTAMINANTS FOR LISTING.—

(A) GENERAL AUTHORITY.—The Administrator shall, in accordance with the procedures established by this subsection, publish a maximum contaminant level goal and promulgate a national primary drinking water regulation for a contaminant (other than a contaminant referred to in paragraph (2) for which a national primary drinking water regulation has been promulgated as of August 6, 1996) if the Administrator determines that—

(i) the contaminant may have an adverse effect on the health of persons;

(ii) the contaminant is known to occur or there is a substantial likelihood that the contaminant will occur in public water systems with a frequency and at levels of public health concern; and

(iii) in the sole judgment of the Administrator, regulation of such contaminant presents a meaningful opportunity for health risk reduction for persons served by public water systems.

(B) REGULATION OF UNREGULATED CONTAMINANTS.—

(i) LISTING OF CONTAMINANTS FOR CONSIDERATION.—(I) Not later than 18 months after August 6, 1996, and every 5 years thereafter, the Administrator, after consultation with the scientific community, including the Science Advisory Board, after notice and opportunity for public comment, and after considering the occurrence data base established under section 300j-4(g) of this title, shall publish a list of contaminants which, at the time of publication, are not subject to any proposed or promulgated national primary drinking water regulation, which are known or anticipated to occur in public water systems, and which may require regulation under this subchapter.

(II) The unregulated contaminants considered under subclause (I) shall include, but not be limited to, substances referred to in section 9601(14) of this title, and substances registered as pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act [7 U.S.C. 136 et seq.].

(III) The Administrator's decision whether or not to select an unregulated contaminant for a list under this clause shall not be subject to judicial review.

(ii) DETERMINATION TO REGULATE.—(I) Not later than 5 years after August 6, 1996, and every 5 years thereafter, the Administrator shall, after notice of the preliminary determination and opportunity for public comment, for not fewer than 5 contaminants included on the list published under clause (i), make determinations of whether or not to regulate such contaminants.

(II) A determination to regulate a contaminant shall be based on findings that the criteria of clauses (i), (ii), and (iii) of subparagraph (A) are satisfied. Such findings shall be based on the best available public health information, including the occurrence data base established under section 300j-4(g) of this title.

(III) The Administrator may make a determination to regulate a contaminant that does not appear on a list under clause (i) if the determination to regulate is made pursuant to subclause (II).

(IV) A determination under this clause not to regulate a contaminant shall be considered final agency action and subject to judicial review.

(iii) REVIEW.—Each document setting forth the determination for a contaminant under clause (ii) shall be available for public comment at such time as the determination is published.

(C) PRIORITIES.—In selecting unregulated contaminants for consideration under subparagraph (B), the Administrator shall select contaminants that present the greatest public health concern. The Administrator, in making such selection, shall take into consideration, among other factors of public health concern, the effect of such contaminants upon subgroups that comprise a meaningful portion of the general population (such as infants, children, pregnant women, the elderly, individuals with a history of serious illness, or other subpopulations) that are identifiable as being at
